SUBJECT: Reason not to use all the frequency specifications of the wireless module .

Dear Yeon-kook Kim,

1. Because the performance of the antenna is not good at some frequencies, only the frequencies used are listed. .
2. For WWAN, WCDMA band B2/4/5 LTE B2/4/5/13 that has been tested at this time among the certified bands of the module is used.
3. Other bands are set to block transmission of the firmware command and are not used.

Thank you
