

# **MPE REPORT**

FCC ID:2AWDJ-BLM5200

Date of issue: May 11, 2020

| Report number:      | MTi20041604-4E2                              |  |  |  |  |
|---------------------|--|--|--|--|--|
| Sample description: | Bluetooth device                             |  |  |  |  |
| Model(s):           | BLM5200                                      |  |  |  |  |
| Applicant:          | Suzhou BeeLinker Technology Co., Ltd         |  |  |  |  |
| Address:            | No.399 Lin Quan Road, Suzhou Industrial Park |  |  |  |  |
| Date of test:       | Apr. 28, 2020 to May 11, 2020                |  |  |  |  |

Shenzhen Microtest Co., Ltd. http://www.mtitest.com

This test report is valid for the tested samples only. It cannot be reproduced except in full without prior written consent of Shenzhen Microtest Co., Ltd.

Report No.: MTi20041604-4E2

**TEST RESULT CERTIFICATION** Applicant's name: Suzhou BeeLinker Technology Co., Ltd Address: No.399 Lin Quan Road, Suzhou Industrial Park Manufacture's name: Suzhou BeeLinker Technology Co., Ltd Address: No.399 Lin Quan Road, Suzhou Industrial Park Product name: Bluetooth device Trademark: BeeLinker Model and/or type reference: BLM5200 Serial model: N/A RF exposure procedures: KDB 447498 D01 v06

This device described above has been tested by Shenzhen Microtest Co., Ltd and the test results show that the equipment under test (EUT) is in compliance with the FCC requirements. And it is applicable only to the tested sample identified in the report.

### RF EXPOSURE EVALUATION

According to FCC 1.1310: The criteria listed in the following table shall be used to evaluate the environment impact of human exposure to radio frequency (RF) Radiation as specified in §1.1307(b)

#### Limits for Maximum Permissible Exposure (MPE)

| Frequency range<br>(MHz) | Electric field strength<br>(V/m) | Magnetic field strength<br>(A/m) | Power density<br>(mW/cm <sup>2</sup> ) | Averaging time<br>(minutes) |  |
|--------------------------|----------------------------------|----------------------------------|--|-----------------------------|--|
|                          | (A) Limits for 0                 | ccupational/Controlled Exp       | osure                                  |                             |  |
| 0.3-3.0                  | 614                              | 1.63                             | *100                                   | 6                           |  |
| 3.0-30                   | 1842/                            | 4.89/1                           | *900/f <sup>2</sup>                    | 6                           |  |
| 30-300                   | 61.4                             | 0.163                            | 1.0                                    | 6                           |  |
| 300-1,500                |                                  |                                  | f/300                                  | 6                           |  |
| 1,500-100,000            |                                  |                                  | 5                                      | 6                           |  |
|                          | (B) Limits for Gene              | ral Population/Uncontrolled      | Exposure                               |                             |  |
| 0.3-1.34                 | 614                              | 1.63                             | *100                                   | 30                          |  |
| 1.34-30                  | 824/                             | 2.19/1                           | *180/f <sup>2</sup>                    | 30                          |  |
| 30-300                   | 27.5                             | 0.073                            | 0.2                                    | 30                          |  |
| 300-1,500                |                                  |                                  | f/1500                                 | 30                          |  |
| 1,500-100,000            |                                  |                                  | 1.0                                    | 30                          |  |

f = frequency in MHz \* = Plane-wave equivalent power density

MPE Calculation Method

Friis transmission formula: Pd= (Pout\*G)\ (4\*pi\*R2)

Where

Pd= Power density in mW/cm2

Pout=output power to antenna in mW

G= Numeric gain of the antenna relative to isotropic antenna

Pi=3.1415926

R= distance between observation point and center of the radiator in cm(20cm)

Pd the limit of MPE, 1mW/cm2. If we know the maximum gain of the antenna and total power input to the antenna, through the calculation, we will know the distance where the MPE limit is reached.

## **Measurement Result**

BLE:

Operation Frequency: 2402-2480MHz

Power density limited: 1mW/ cm<sup>2</sup>

Antenna Type: PCB Antenna;

WIFI antenna gain: 2dBi

R=20cm

 $mW=10^{(dBm/10)}$ 

antenna gain Numeric=10^(dBi/10)= 10^(2/10)=1.58

| Channel<br>Freq. modulation<br>(MHz) | conducted power | Tune-<br>up | Max   |               | Antenna |       | Evaluation result | Power density Limits |               |

| 2402                                 |                 | 0.066       | 0±1   | 1             | 1.259   | 2.00  | 1.58              | 0.0004               | 1             |
| 2440                                 | GFSK            | 0.088       | 0±1   | 1             | 1.259   | 2.00  | 1.58              | 0.0004               | 1             |
| 2480                                 |                 | -0.22       | 0±1   | 1             | 1.259   | 2.00  | 1.58              | 0.0004               | 1             |

#### **Conclusion:**

For the max result: 0.0004≤ 1.0 for 1g SAR, No SAR is required.
