Technical parameters:

1. Product model:
- 2, aromatherapy power: 1W
3. Wireless charging power: 10W
- 4, disinfection power: LED-2W/ ozone tube -3W
- 5, UV lamp power: 2W

6. Number of UV lamp beads: 6

7, input voltage/current: 5V/2A 9V/2A

8, output voltage/current: 9V/1.1A

9. Transmission distance: 2-6mm

10, charging efficiency of 80%

11. Product size:

12. Product weight:

13. Charging method: wireless transmission

14, charging state indication: standby blue light is always on, charging blue light breathing, full of blue light off, abnormal blue light flash

Mobile phone wireless charging instructions:

1. Connect the wireless charging disinfection box to the power adapter and turn on the power, and the blue indicator light will breathe.

To add a pleasant aroma to an item, add one drop of liquid aromatherapy to the aromatherapy point in the wireless disinfectant box before disinfection. (Liquid aromatherapy must be

purchased separately)

Product features:

1, sterilization effect: 99.99%

2. The product has long life and strong durability

3, delicate small, easy to carry, do not occupy a place

4, aviation aluminum industry design, strong sense of science and technology

5, comprehensive disinfection and sterilization, side cross UV disinfection and sterilization, 360 degree cycle without dead Angle.

6, can be the player wireless charging function, can be charged in the process of sterilization.

7, aromatherapy function.

8, large capacity and multi-function, can be used to sterilize mobile phones, masks, jewelry watches, etc

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
