Wireless Lavalier Microphone V1

Double size

Product Introduction 1

Thank you for choosing GHKJOK's product. Our Wireless Lavalier Microphone provides professional-grade recording and live streaming output, with a plug-and-play design that doesn't require an app. It's perfect for a variety of use cases, including live streaming vlogging, program interviews, recording interviews, and video teaching. The lavalier microphone consists of two parts: 2 transmitters and 1 receiver, as shown in the figure below.

Transmitter *2

Receiver

Function Introduction 2

(1) Receiver function introduction

- Recording output port: Plug in to connect with a mobile phone
- Status indicator:
 - Not connected - blue light flashes
 - Connected to one transmitter only - blue light stays on
 - Both transmitters connected - green light stays on.
- Charging port: Use a Type-C charging cable to connect and charge your phone.

Function Introduction 3

(2) Transmitter Function Introduction

- Microphone Head: This part should be aimed at the mouth for voice recording.
- Charging Port: The green light flashes slowly when charging the green light turns off when fully charged, and the red light flashes slowly when the battery is low.
- Power Button: Press and hold this button for 3 seconds to turn on/off the device; Short press this button to turn on/off the noise reduction function, and the noise reduction status is indicated by a steady green light. Turning off the noise reduction function is indicated by a steady red light;

Function Introduction 4

Double-click this button to turn on/off the mute function, and the mute status is indicated by a fast flashing red light. Forced Pairing: Press and hold the transmitter's power button for 8 seconds until the green light starts flashing. Then, insert the receiver into the phone (if already inserted, remove and re-insert it). When the pairing is complete, the green light stays on.

④ Status Indicator Light.

Instructions 1

Step 1: Press and hold the power button on both transmitters for 3 seconds until the status indicator light flashes blue.

Step 2: Insert the receiver into your phone, and both transmitters will connect to the receiver successfully. The status indicator light will stay blue.

Instructions 2

Step 3: If the pairing is not successful, press and hold the power button on the transmitter for 8 seconds. The indicator light of the transmitter will flash blue. Then, insert the receiver into the phone (if already inserted, remove it and re-insert it). Once paired, the blue light will remain on.

Step 4: Open the camera or other recording app on your phone to start recording audio and video.

Status indicator light stays blue.

Warning:

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Statement:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The product is a portable device and meets the exposure assessment requirements for portable devices.
