FOD(Foreign body detection)	The red light flashes quickly.

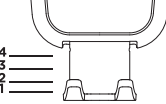

Manually Adjust the Charging Gear

1Gear:
① iPhone 12Mini, iPhone 8.

2Gear:
① iPhone X, iPhone XS, iPhone 11 Pro, iPhone 12, iPhone 12 Pro.
② Samsung S10e, S9.

3Gear:
① iPhone XR, iPhone 11, iPhone 8Plus, iPhone XS Max, iPhone 11 Pro Max.
② Samsung S8, Note10, S9+, S10, S10+, Note10, S21.
③ HUAWEI P30 Pro, P40 Pro, P40 Pro+, Mate20 Pro, Mate30 Pro, Mate40.

4Gear:
① iPhone 12Pro Max.
② Samsung S8+, Note8, Note9, Note10+, Note20, Note20 Ultra, S20, S20 Ultra, S20+, S21, S21+, S21 Ultra.
③ HUAWEI Mate30, Mate40Pro, Mate40Pro+.

Three gears can be adjusted manually

FAQ

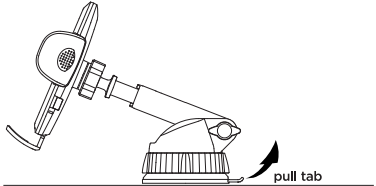

Q: Why can't the mobile phone be charged after connecting with the device?

A:

- Please check whether the mobile phone supports wireless charging function;
- Please check whether the wireless car charger holder is powered on;
- If there are no above problems, please check whether the coil circle central of the holder is aligned with the coil center of the mobile phone. And if not, please stretch the bottom support to adjust the position to align with the charging sensing area.
- Please contact the customer service if this device still can't support charging it.

① Attention

- This product is suitable for -20 75 degree temperature environment
- Suitable for use in sealed (non-breathable) automotive instrument panels, such as: plastic panels, EVA surfaces; can not be used on leather, textile flannel surfaces
- The suction position of the suction cup is flat (not curved or meandered), and the surface texture should not be too rough (the groove width is less than 0.5mm thickness)
- The glue suction cup should be kept clean. After the surface is dirty, it can be washed with water, dried and then used
- Suction plate pressure valve keeps open when packaged and not in use, ensuring product life
- Remove the suction cup by using the pull tab

pull tab

Warning

- Do not dismantle the product or refit it by yourself.
- Do not put this product in a humid environment.
- Please do not charge the product near the heat source or around it.
- Do not let water or other liquids flow into the internal interface of this product, otherwise it may cause damage to the product.
- Do not install the wireless charger on the airbag cover or airbag deployment area.
- Please remove the metal and magnetic protective case or card (such as bank card) from your device when charging it.
- It is normal to generate heat when charging and will not affect the performance of the product. But if you feel that the phone or the product is overheated, please disconnect the power supply and charge it after cooling down.
- Avoid using the bent or damaged USB cables please.

Instruction of after-sale services

Thanks to my dear users for using our products. In order to protect your rights and interests, you'd better know clearly that distribution agents and companies bear the responsibility of product maintenance, replacement and return. Please refer to the following items:

- Product warranty card, necessary credential, which can provide after-sales service for free during the warranty period.
- According to the principle of "who sells, who is responsible for the Three Guarantees", you can contact the distributor by providing with the warranty(product guarantees card) if the product causes quality problems. The distributor will service the customer, while our company will support the distributor.

The company undertakes that if there is any quality problem within 7 days from the date of sale(the date is valid, the date of the bill shall prevail), the customer can choose to return the product for replacement and provide maintenance service for you. Or if the occurred quality problems beyond warranty period, we can provide lifetime maintenance service for you (each after-sales service site only charges fees for component materials); please fill in the warranty (product guarantees card) with distributor when purchasing:

- Warranty exceptions:
 - Exceed the Warranty service time.
 - Damage caused by using, maintaining, keeping it not according to the instructions.
 - Damage caused by dismantling by the others who are not within the warranty scope.
 - No warranty/guarantees card.

⑤ The contents of the guarantee card are not equal to the physical product or it's altered.
⑥ Caused by force majeure.

5. All rights reserved by our company.

FCC statement:
This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
--Reorient or relocate the receiving antenna.
--Increase the separation between the equipment and receiver.
--Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
--Consult the dealer or an experienced radio/TV technician for help.
Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
Radiation Exposure Statement
This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. During the operation of device a distance of 15 cm surrounding the device and 20 cm above the top surface of the device must be respected.
