Re: **Iridium Non-Broadcast Station Transmitter Model No. 9602N  
FCC Identifier Q639603N (FCC Equipment Authorization  
Granted 02/10/2015)**

Dear Sir:

Iridium Satellite LLC ("Iridium"), in response to the request of, Spider Tracks Limited ("ST"), 205/150 Karangahape Road, Auckland Central, Auckland 1010, New Zealand, and pursuant to the provisions of Section 2.933 of the rules and regulations of the Federal Communications Commission ("FCC"), hereby provides ST with permission to file for an independent FCC equipment authorization identifier making use of the technical compliance data submitted in connection with the above-referenced FCC Identifier granted Iridium's non-broadcast transmitter bearing Iridium Model No. 9602N (the "Device").

ST's request to Iridium is based on its representation that ST intends, upon receipt of the FCC Identifier, to treat the Device as a module and to install the Device in a host device to be marketed by ST that will include additional antennas, modules, and other parts and components that bear no relationship, other than contained the Device's functionality, to the Device or Iridium's other devices and products.

In support of its request to Iridium, and upon which Iridium is relying, ST has represented and warranted that ST has not and will not effect any change in the design, circuitry or construction of the Device. ST further agrees to indemnify and hold harmless Iridium from all loss, liability, expense or damages (including but not limited to reasonable attorneys' fees, litigation expenses, FCC and other governmental fines and forfeitures, and settlement costs) incurred by Iridium arising out of any liability to government agencies of the United States of America, and any person or entity that purchases, leases, or otherwise uses equipment produced or sold by ST that contains the Device, excepting for any liability arising from the operation of the Device as a stand-alone device and not as part of a host device or equipment containing other parts and components that Iridium has neither reviewed, approved, or tested.

Should this be a correct recitation of our mutual understanding, ST is hereby given Iridium's permission to file for, under the terms of Section 2.933, an FCC Identifier to market a device reliant upon the Device's equipment characteristics. This permission is also not intended to evidence a transfer of ownership in the Device or to authorize ST to license or transfer ownership or design of the Device to any other party, or to grant similar Section 2.933 permission to any other party. In addition, this understanding is not intended to restrict or to prevent Iridium's continued (or discontinued) marketing and sale of the Device, in its current or any changed design or performance characteristics, to other parties under such terms and conditions as Iridium shall establish and maintain at its absolute discretion.

In order to evidence ST's acceptance of the terms and conditions contained in this letter agreement, an authorized officer of ST must counter-sign this letter agreement below and promptly return the counter-signed letter to us.

If ST should have any questions concerning this letter or the understandings contained herein, ST should promptly communicate with Iridium's counsel: Maureen C. McLaughlin, Esq., Vice President Public Policy, Suite 1400, 1750 Tysons Boulevard, McLean, Virginia 22102, at 703-287-7400.

Sincerely,

IRIDIUM SATELLITE LLC
