Product Name: Interactive Flat Panel Display

Model Name:

TM65D、TM65C、TP65E、TP65P、TB65E、TB65P、V3-65、X3-65、V2-65、X2-65、TM65*、TB65*、TC65*（* can be letter A to Z）；

TM75D、TM75C、TP75E、TP75P、TB75E、TB75P、V3-75、X3-75、V2-75、X2-75、TM75*、TB75*、TC75*（* can be letter A to Z）；

TM86D、TM86C、TP86E、TP86P、TB86E、TB86P、V3-86、X3-86、V2-86、X2-86、TM86*、TB86*、TC86*（* can be letter A to Z）

Important safety instructions

Thank you for purchasing our product. The product have passed the rigorous testing before delivery, but incorrect usage may cause electric shock and fire. In order to ensure safety and extending the life of this product and providing the best performance of the machine, please read the following rules before using this product and observe the following safety instructions.

* In the event of any of the following conditions, unplug the machine from the outlet and ask qualified maintenance personnel for service:

- a. The power wire or power plug is damaged or worn out.
- b. The machine fell or the case is damaged.
- c. There is obvious abnormality. You operate according to instructions, but the machine still does not work.
- d. Foreign body or liquid enters the machine.
- e. There are unusual sounds or gas emitted.

* The machine has high pressure. In order to prevent the occurrence of danger, please do not open the device.

If you need maintenance, please ask technical support for help.

* Keep the product in a well-ventilated area. Do not place the product in an too heated, cold and humid environment. Do not place it under direct sunlight.

* The holes in the case are designed for ventilation and cooling to ensure long-term reliable operation of the components inside the machine and prevent overheating. When placing the machine, It's important to pay attention to prevent plugging holes.

* Do not place the product in embedded device unless there is a good ventilation device.

* Do not place the unit on an unstable level. Prevent falling or damage.

* Do not use the product where is closing water or wet basements and other similar environments.

* Remember to unplug the power wire when cleaning. Please use a slightly damp soft cloth gently wipe the machine lightly instead of liquid or spray cleaner and alcohol, solvents or ammonia-containing liquid.

* Before using this machine, please read and understand all the instructions and indications and keep the user manual for future usage.

* Do not use the parts which are not recommended by the manufacturer to avoid danger.

* Power wire should be properly placed to avoid being trampled and objects squeezed.

* Do not overload the power outlet or extend the length of power wire to avoid ☐ re and electric shock.

* All specifications in this manual and the packaging are subject to change without notice. If there is a slight difference between the manual and the actual operation, please take the actual operation as the standard.

* When the power plug or appliance coupling agent is used as a disconnect device, the disconnect device should be easy to operate.

* The machine should not suffer water droplets or splashes.

Do not place containers containing water (or other liquids, etc.)

on the product, because it may result in fire or electric shock.

* The power plug should be fully inserted into the power outlet. If it is loose may cause sparks and fire.

* Do not place flammable and explosive materials near the product.

* Please do not put any sharp objects, metal or liquid into or touch the signal connector or heat dissipation hole to avoid short circuit, damage product and electric shock.

* Do not use the product immediately after moving it from a low temperature place to high temperature or facing the air conditioner. These may cause condensation inside the machine and malfunction.

* Move the product carefully to avoid hit. It's important to protect the screen section.

In addition, if use trolley, it's necessary to beware of the damage caused by the sudden braking, excessive force, and uneven ground.

* AC inlet as disconnection device

* The unit with Class I construction shall be connected to a mains socket-outlet with a protective earthing connection

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Caution

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
