

The background features decorative curved lines in green and grey. A thick grey curve starts from the top left and curves towards the bottom right. A thinner green curve follows a similar path, positioned slightly above and to the right of the grey one. Another green curve is visible at the bottom left, curving upwards towards the center.

**If the Bluetooth connection is not successful, check the possible causes by following the steps below.**

- (1) Please make sure to press the switch on the back of the light to "ON" state.
- (2) Please make sure that your phone's Bluetooth is turned on.
- (3) Please make sure the lights are within 32ft(10m) coverage of the mobile phone.
- (4) Please check whether the light can light up normally at night,if not, the battery may be out of power,please charge the light under the sun until it can be used normally.
- (5) This lighting kit adopts the Bluetooth 4.0 version, which only supports connection with one phone. Check if the lighting kit has been paired to a phone. If yes, please disconnect it with the previous phone and pair it to yours.
- (6) Check if the Bluetooth is successfully paired to the lighting kit. If not, exit the APP and restart it to connect the lighting kit again.
- (7) If the Bluetooth connection still fails after restarting the APP, please exit the APP and reboot your phone.
- (8) Please note that the mobile APP can connect up to 6pcs of lights at the same time.

## FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.
