

User manual

Model	Y1/Y22/Y33/GM-F8
Number of Buttons	4
Left & Right Button Operating Force	70g±10g
Lifespan of Left & Right Buttons	30 million clicks
Interface	USB 2.0
Input	DC 3V 20mA
Sensor	FCT3065
Max Resolution	1600 DPI
Max Acceleration	2G
Polling Rate	250Hz
System Requirements	Windows XP / Vista / 7/8/ 10, Mac OS
Casing Material	ABS
Dimensions	100 x 60 x 30mm / 3.9 "x 2.3 "x1.2"
Weight	55g/1.9oz

Note

- Access the battery compartment and USB receiver by holding the top cover release button while sliding the top cover backward and lifting it up

Getting Started

1. Turn on your computer

2. Hold the mouse top cover release button while sliding the top cover backward and lifting it up

3. Take the USB receiver out of the mouse (middle of battery compartment) and plug the USB receiver into a USB port on your computer

4. Install two AAA batteries (not included) in the battery compartment

5. Reattach the top cover by pushing it down at the back and sliding it forward

6. Turn on the mouse with the on/off switch on the bottom

7. Wait for a few seconds until your computer recognizes the mouse before use

8. Press the DPI adjustment button to switch between the 3 DPI levels

9. If the batteries are rechargeable, you can use a USB-C cable [not included] to recharge them

E-Key Actions

- Single-click to go back to the computer desktop
- Double-click to lock the computer
- Long-press to put the computer in sleep mode

(1)§ 15.19 Labelling requirements.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

§ 15.105 Information to the user.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
