Use sleep tracking function. The device must be paired with the phone App. Make sure your device is sufficiently charged for the duration of the test. Sleep tracking is preprogrammed to start automatically between 8PM to 8AM the next day (2000-0800). Make sure you are wearing your device on your wrist during the entire duration of the testing periods (8 hrs). Don't forget to plug in your device to charge to a fully charged state. Don't forget to turn on Do Not Disturb function and/or lower the screen brightness. The data will be automatically uploaded to the phone App on the next day when you are using the App. The device can store up to 7 days of sleeping data without the phone.

Measures your heart rate in beats per minute

Measures oxygen levels in your blood.
