Maintenance and Safety

Please read this safety information carefully so that you can use your phone in safe condition:

1. Around children

Please be very careful with children and your phone. A mobile phone contains a number of detachable parts, while swallowing these little parts may cause asphyxiation.

2. Hearing damage

Prolonged listening at very high volume may damage your hearing. Please reduce the volume to the lowest possible level when listening to music or having a call.

3. Fire hazard

Do not leave your phone near heat sources such as radiators or cookers. Do not leave your phone charging near flammable materials as there is a risk of fire.

4. At a gas station

Do not use your phone at gas station. In fact, it's always best to turn it off whenever you're near fuels, chemicals or explosives.

5. Contact with liquid

Do not expose the phone to liquid or touch it with wet hands, since damage caused by water may be irreparable.

6. Do not destroy the battery and charger

Never use a battery or charger that has been damaged. Keep the battery away from magnetic objects as the latter might cause short-circuit of your battery and destroy it permanently. As a general rule, you should not expose the battery to very high or low temperature (below 0°C or above 45°C). Differences in temperature may reduce service life.

7. Shocks and impact

Protect your phone from shock and impact. Some parts of the phone are made from glass and might break if the phone is dropped or is subject to severe impact. Avoid dropping the phone and touching the screen with sharp objects.

8. Maintenance

Do not try to disassemble your phone as there is a risk of electric shock. If you want to clean your handset, please use a dry cloth (do not use a solvent, such as benzene or alcohol).

9. Temperature

Do not use the phone in the environment at too high or too low temperature, never expose the mobile phone to burning sun or totally wet surrounding. The suitable temperature for the phone is 0°C to 45°C.
