Familiar with this product

Remote control

Light-sensing key: the remote control senses the key when the hand is near the light-sensing area of the remote control about 10CM, and then sends a wireless signal out.

LED indicating lamp

The LED will go on for 2 seconds when the remote control senses the button

Battery compartment: The remote control needs 3 AAA batteries

Receiver

Battery box: Install 4 AA batteries;

Motor wire: connected to external motor

Working principle: the remote control send the wireless data TO Receiver  
at the same time control motor

Products matching

1. The electric buzzer on the receiver box rings
2. The battery LED on the remote control displays twice, and the receiver box buzzer rings once
3. Repeat the two steps three times, and the receiver box will ring once to indicate successful pairing

Technical parameters:

Operating frequency: 2421MHz, a total of 1 channel

Modulation: GFSK

Transmission rate: 500kbps

Rf transmission power: 7DBM;

Operating temperature: -40°C ~ 85°C;

Precautions for Use:

the products to avoid get wet in rain directly;

if the sensor is invalid, with the battery needs to wait for 20 seconds before induction, 20 seconds later the system will automatically reset.

**NOTE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular

installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
