other characteristics

1. PIP function

- 1.PIP function is a special type of multi-window mode
 - 2.The window that is playing the video can be hovered over other apps that are in use. The floating window can be dragged anywhere and then continue working on the home screen.
- When playing video in full screen on Google Chrome browser, press the Home button or double-click on the multi-tasking button to return to the desktop, and the video being watched will be displayed in picture-in-picture mode.

2. Specific operation

1. Is to install the latest version of chrome, then open a video site to play video, and then full screen.
2. The last home button switches background tasks and switches on automatically when switched back to the desktop.
3. Tap the video window to pause, next set, and full screen.

Note: There are few applications currently supported.

3. SmartTextSelection

Automatically detect the function that applies it to the corresponding application. If you click on the address of a restaurant sent to you by a friend,

Google will know what you want and automatically use the map to start the route. Telephone numbers, e-mail addresses, etc. can also be done

4. Auto-Fill

For the most frequently used applications on the user's device, it will help the user to log in quickly without having to fill in the account name and password every time.

For example, when users use a new device, they can extract saved account names and passwords from Chrome. After the selection, the auto-fill function can be performed locally. It is suitable for most applications that you may use.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

Note: The manufacturer ensures that the frequency stability of this U-NII device can maintain transmission within the operating frequency band under all normal operating conditions.
