

TRACKONOMY[®]

To whom it may concern,

We, Trackonomy Systems, Inc. request Long-Term Confidentiality for “internal photos” and “user manual” for FCC application of our product GBP-2002. Below are the detail justifications:

1. The ‘user manual’ and ‘internal photos’ of the product contain highly confidential and proprietary information.
2. The GBP-2002 product is not user serviceable and can only be installed and serviced by authorized and trained professionals and users are not allowed to disassemble the product. Trackonomy offers support services for the entire life cycle of the product including service to requirements for decommissioning and sunsetting to keep essential infrastructure working smoothly using this product.
3. All sales for these devices must be under an NDA restricting the disclosure of the propriety information, including internal photos and user manual.
4. User manual contains proprietary technical information intended for professional technicians obligated under an NDA.
5. All sales of this enterprise (non-consumer) device will be under an NDA. The scope of the NDA also extends to third party customers and that the final business or enterprise user of the device is subject to the NDA.
6. The GBP-2002 product and its sub-assemblies are integrated using Trackonomy proprietary integration process.
7. All points mentioned above in our support letter document allow for the provision of claiming long term confidentiality based on FCC KDB number 726920. Based on this we qualify and are requesting for long term confidentiality.

Dr. Saurabh Sanghai
Director of Engineering
