USER MANUAL V1.0

FCC Warning

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.

• Increase the separation between the equipment and receiver.

• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

• Consult the dealer or an experienced radio/TV technician for help.

Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

140.00 mm

EN Important safety considerations

The following safety instructions ensure the long service life of the projector to avoid fire or electric shock. Make sure to read them carefully and pay attention to all the following warnings.

- Do not install the projector in sites with improper ventilation.
- Do not install the projector in hot and humid sites.
- Do not block the ventilation holes(intake or exhaust).
- Do not install the projector in dust and smoke sites.
- Do not install the projector near the temperature and smoke transducer. It may cause a sensor failure.
- Do not install the projector in sites with direct blowing of warm and cool air-condition wind. Otherwise it may cause the projector failure due to moisture condensation or temperature increment.

Package Include

TroubleShooting

- Q: Why is the projection screen so blurry?
A: Please keep the projection screen above 45 inches and adjust the focus until the screen is clear.
- Q: Connected to my laptop via HDMI port, but projector keeps "No signal"?
A: Please make sure your laptop is set to projection mode. If still fails, please try to connect the projector to other devices such as TV stick with the HDMI cable. If the connection is successful, the projector has no problem. Please check the projection settings of your laptop.
- Q: Why is there no sound when playing Netflix videos?
A: Turn off Dolby surround sound on your connected devices such as Firestick and Chromecast when watching Netflix videos.
- Q: Why does the projector screen flicker?
A: If you unplug the power directly during use, the screen will flash slightly when you start it next time and disappear after 5 minutes. Please do not unplug the power during use. If you need to shut down, please press the remote control to shut down.
