

# RF Exposure Evaluation Declaration

---

**FCC ID:** 2AXJ4M4V4

**APPLICANT:** TP-Link Corporation Limited

**Application Type:** Certification

**Product:** AC1200 Whole Home Mesh Wi-Fi System

**Model No.:** Deco M4

**Brand Name:** tp-link

**FCC Classification:** Digital Transmission System (DTS)  
Unlicensed National Information Infrastructure (NII)

**Test Procedure(s):** KDB 447498 D01v06

Reviewed By:

## General Information

|                                 |  |
|---------------------------------|--|
| <b>Applicant</b>                | TP-Link Corporation Limited  |
| <b>Applicant Address</b>        | Room 901, 9/F., New East Ocean Centre, 9 Science Museum Road, Tsim Sha Tsui, Kowloon, Hongkong |
| <b>Manufacturer</b>             | TP-Link Corporation Limited  |
| <b>Manufacturer Address</b>     | Room 901, 9/F., New East Ocean Centre, 9 Science Museum Road, Tsim Sha Tsui, Kowloon, Hongkong |
| <b>Test Site</b>                | MRT Technology (Taiwan) Co., Ltd   |
| <b>Test Site Address</b>        | No. 38, Fuxing Second Rd., Guishan Dist., Taoyuan City 333, Taiwan (R.O.C)                     |
| <b>MRT FCC Registration No.</b> | 291082   |

## Test Facility / Accreditations

1. MRT facility is a FCC registered (Reg. No. 291082) test facility with the site description report on file and is designated by the FCC as an Accredited Test Firm.
2. MRT facility is an IC registered (MRT Reg. No. 21723) test laboratory with the site description on file at Industry Canada.
3. MRT Lab is accredited to ISO 17025 by the Taiwan Accreditation Foundation (TAF Cert. No. 3261) in EMC, Telecommunications and Radio testing for FCC (Designation Number: TW3261), Industry Taiwan, EU and TELEC Rules.

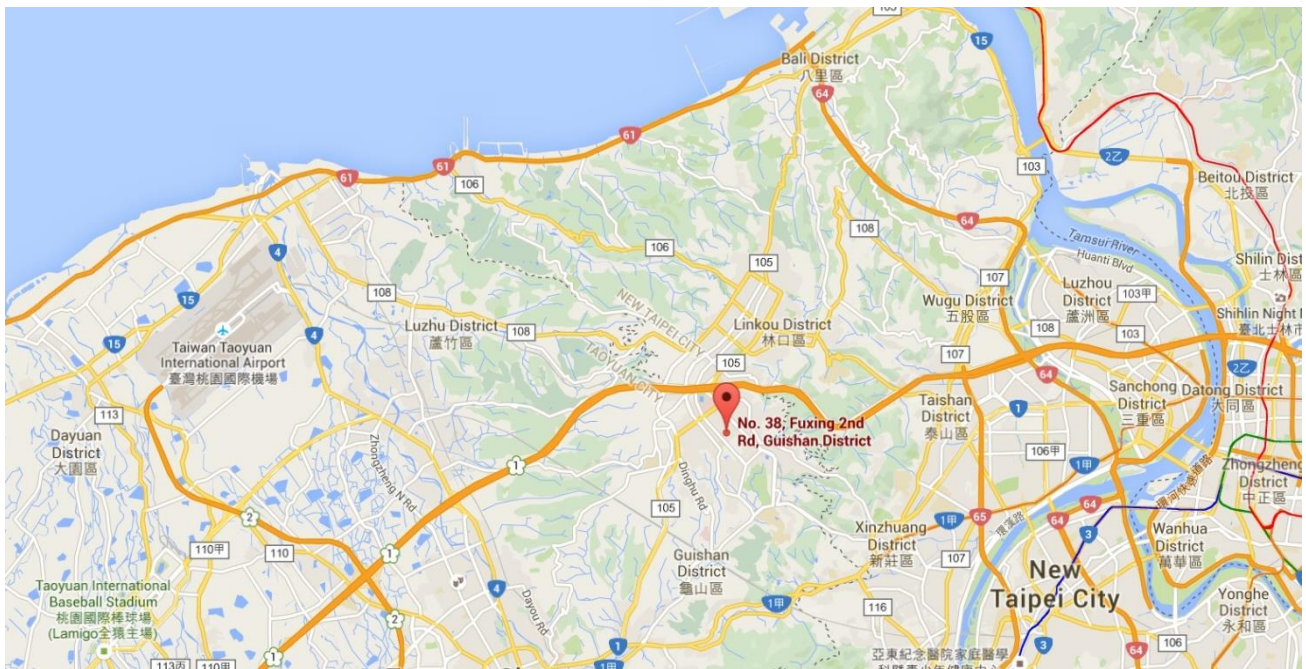

## 1. INTRODUCTION

### 1.1. Scope

Measurement and determination of electromagnetic emissions (EMC) of radio frequency devices including intentional and/or unintentional radiators for compliance with the technical rules and regulations of the Federal Communications Commission and the Innovation, Science and Economic Development Canada and Certification and Engineering Bureau.

### 1.2. MRT Test Location

The map below shows the location of the MRT LABORATORY, its proximity to the Taoyuan City. These measurement tests were conducted at the MRT Technology (Taiwan) Co., Ltd. Facility located at No.38, Fuxing 2nd Rd., Guishan Dist., Taoyuan City 33377, Taiwan (R.O.C).

## 2. PRODUCT INFORMATION

### 2.1. Equipment Description

|                       |  |
|-----------------------|--|
| Product Name          | AC1200 Whole Home Mesh Wi-Fi System  |
| Model No.             | Deco M4  |
| Wi-Fi Specification   | 802.11a/b/g/n/ac   |
| Power Type            | AC Power Adapter   |
| Operating Environment | Indoor Use   |
| Antenna Information   | Refer to Section 2.2   |
| Accessories           |  |
| AC Power Adapter      | Model: T120150-2B1<br>Input: 100-240V ~ 50/60Hz, 0.6A<br>Output: 12V, 1.5A |

Note: The information shown above was provided by manufacturer, and the accuracy of the information shall be the responsibility of the manufacturer.

### 2.2. Description of Available Antennas

| Antenna Type             | Frequency Band (GHz) | Max Peak Gain (dBi) | CDD Directional Gain (dBi) |         |
|--------------------------|----------------------|---------------------|----------------------------|---------|
|                          |                      |                     | For Power                  | For PSD |
| Wi-Fi Antenna (2*2 MIMO) |                      |                     |                            |         |
| Dipole                   | 2.4 ~ 2.5            | 1.5                 | 1.5                        | 4.51    |
|                          | 5.15 ~ 5.25          | 1.0                 | 1.0                        | 4.01    |
|                          | 5.725 ~ 5.85         | 1.0                 | 1.0                        | 4.01    |

Note:

The EUT supports Cyclic Delay Diversity (CDD) mode, and CDD signals are correlated.

For CDD transmissions, directional gain is calculated as follows,  $N_{ANT} = 2$ ,  $N_{SS} = 1$ .

If all antennas have the same gain,  $G_{ANT}$ , Directional gain =  $G_{ANT} + \text{Array Gain}$ , where Array Gain is as follows.

- For power spectral density (PSD) measurements on all devices,  
 $\text{Array Gain} = 10 \log (N_{ANT} / N_{SS}) \text{ dB} = 3.01$ ;
- For power measurements on IEEE 802.11 devices,  
 $\text{Array Gain} = 0 \text{ dB for } N_{ANT} \leq 4$ ;

### 3. RF Exposure Evaluation

#### 3.1. Limits

According to FCC 1.1310: The criteria listed in the following table shall be used to evaluate the environment impact of human exposure to radio frequency (RF) radiation as specified in 1.1307(b)

#### LIMITS FOR MAXIMUM PERMISSIBLE EXPOSURE (MPE)

| Frequency Range (MHz)                                     | Electric Field Strength (V/m) | Magnetic Field Strength (A/m) | Power Density (mW/cm <sup>2</sup> ) | Average Time (Minutes) |
|---|-------------------------------|-------------------------------|-------------------------------------|------------------------|
| (A) Limits for Occupational/ Control Exposures            |                               |                               |                                     |                        |
| 300-1500  | --                            | --                            | f/300                               | 6                      |
| 1500-100,000  | --                            | --                            | 5                                   | 6                      |
| (B) Limits for General Population/ Uncontrolled Exposures |                               |                               |                                     |                        |
| 300-1500  | --                            | --                            | f/1500                              | 6                      |
| 1500-100,000  | --                            | --                            | 1                                   | 30                     |

f= Frequency in MHz

Calculation Formula:  $P_d = (P_{out} * G) / (4 * \pi * r^2)$

Where

$P_d$  = power density in mW/cm<sup>2</sup>

$P_{out}$  = output power to antenna in mW

G = gain of antenna in linear scale

$\pi$  = 3.1416

r = distance between observation point and center of the radiator in cm

$P_d$  is the limit of MPE, 1mW/cm<sup>2</sup>. If we know the maximum gain of the antenna and the total power input to the antenna, through the calculation, we will know the distance r where the MPE limit is reached.

### 3.2. Test Result

|           |                                     |
|-----------|-------------------------------------|
| Product   | AC1200 Whole Home Mesh Wi-Fi System |
| Test Item | RF Exposure Evaluation              |

Antenna Gain: Refer to clause 2.2.

| Test Mode    | Frequency Band (MHz)        | Max Conducted Power (dBm) | Antenna Gain (dBi) | Max EIRP (dBm) |
|--------------|-----------------------------|---------------------------|--------------------|----------------|
| 802.11b/g/n  | 2412 ~ 2462                 | 25.80                     | 1.5                | 27.3           |
| 802.11a/n/ac | 5180 ~ 5240,<br>5745 ~ 5825 | 26.90                     | 1.0                | 27.9           |

| Test Mode    | Frequency Band (MHz)        | Maximum EIRP (dBm) | Compliance Distance (cm) | Power Density (mW/cm <sup>2</sup> ) | Limit (mW/cm <sup>2</sup> ) |
|--------------|-----------------------------|--------------------|--------------------------|-------------------------------------|-----------------------------|
| 802.11b/g/n  | 2412 ~ 2462                 | 27.3               | 20.00                    | 0.1068                              | 1                           |
| 802.11a/n/ac | 5180 ~ 5240,<br>5745 ~ 5825 | 27.9               | 20.00                    | 0.1227                              | 1                           |

#### CONCLUSION:

WLAN 2.4GHz, WLAN 5GHz can transmit simultaneously.

The max Power Density at R (20 cm) =  $0.1068\text{mW/cm}^2 + 0.1227\text{mW/cm}^2 = 0.2295\text{mW/cm}^2 < 1\text{mW/cm}^2$ .

Therefore, the compliance distance is 20cm.
