## 15W High Speed Compact Magnetic Wireless Charger

User Guide

### English

#### Appearance & Interface Description:

1. Wireless Charging Area
2. USB-C Charging Input

#### Operation Instructions:

1. Connect the USB-C cable into the power adapter
2. The LED will flash in white 1 time before going into standby mode.
3. Place the MagTag-15W on the magnetic wireless charging interface of a compatible device, aligning the coils in both the charger and device.
4. The LED will keep flashing if any obstruction is found between the charging interfaces.

**Note: 20W Power Delivery or Quick Charge 3.0 charging adapter is required to provide 15W ultra-speed charging output.**

### English

Correct disposal of this Product (Waste Electrical & Electronic Equipment (WEEE) Your product is designed and manufactured with high quality materials and components which can be recycled and reused. This symbol means that electrical and electronic equipment, at their end-of-life should be disposed of separately from your household waste. Please dispose of this equipment at your local community waste collection/recycling center.

This product complies with European safety and electrical interference directives

### RoHS

This product does not contain environmentally hazardous materials (lead, mercury, cadmium, hexavalent chromium and brominated flammable agents: PBB and PBDE).

### FCC statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help
