Made in china

## User Guide

### Magnetic wireless car charger A5

#### Parameter

Product name	Magnetic wireless car charger A5
Compatible device	Mobile phone/earphones that supports wireless charging
Input	5V/3A 9V/2A 12V/1.5A
Output	7.5W/10W/15W
Color	Black / White
Product size	20cm
Product weight	about 40 g
Charging distance	≤8mm
Conversion rate	≥80%
Material	Zinc Alloy + Tempered Glass
Charging interface	Type-C

## Guarantee

• During the validity period, you can enjoy free return, exchange, repair services, product returns and repairs should be handled with invoices.

• Once the product has performance failures listed in the "Product Performance Failure Table", After testing and confirming, you can get the following services for free:

Service Type	Service Policy
Return	The product can be returned if there is a quality failure within 7 days from the day after the receipt.
Replacement	The product can be replaced if there is a quality failure within 15 days from the day after the receipt.
Maintenance	The product has a quality failure within 1 year from the day after the receipt and can be repaired.

## Product performance failure table

Defective type	
	Shell cracks caused by structural or material factors;
	The plug is loose and cannot be inserted into the socket;
	Charging performance fails.

## FCC Statement

This device complies with part 15 and part 18 of the FCC Rules. Operation is Subject To the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not explicitly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Note: this equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 and part 18 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and candidate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help. The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. During the operation of device a distance of 15 cm surrounding the device and 20 cm above the top surface of the device must be respected.

This device complies with Part 18 of the FCC Rules. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Increase the separation between the equipment and any other radio device.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
