minimi Small is Beauty

The smallest, lightest size in the world World's first wireless remote control feature for distance measurements without shaking hands Patented eSlope (Magic Slope Basic) Calculation of distance considering humidity, altitude, and temperature Superclear 6X lens, SLOPE ON/OFF LED BAR Internal battery chargeable with USB cable New Trend-Reading Design

DETAIL NAME

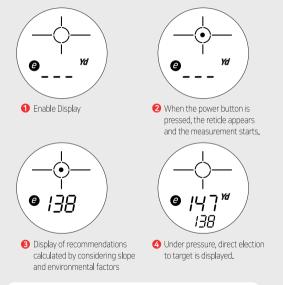

- 1 Aim Reticle
- 2 Active laser
- 8 Meter/yard display
- Slope correction Distance
- A straight Distance to the target

POWER & DISTANCE MEASUREMENT

Press the power button once to turn it on, aim it at the target, Pressing the power button completes the measurement and displays the target distance.

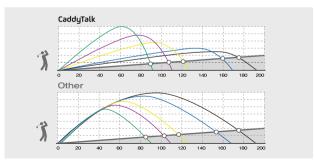

X Automatic power off occurs when the button is not pressed for 10 seconds

MAGIC SLOPE

Considering the altitude (high&low) of the target point, This function shows the best recommendation.

The Magic Slope developed directly in the golf zone, Applying the ballistics concept of Ballistics, Accuracy of recommended distances over existing products It has improved dramatically. The differences from generic products that do not take into account ballistics are shown below.

CaddyTalk minimi E-SLOPE with temperature and humidity environment variables

Based on Magic Slope Function Calculate the environmental factors (temperature, altitude, humidity) of the golf course. The exact distance patented technology that provides golfers with a recommendation.

Example

High-level golf courses require adjustment of the target distance due to lower air pressure than low-lying golf courses

If the measured distance to the pin is the same as 138yd

For 656ft above sea level golf course eSlope Recommended Distance 137yd

For golf courses 3608ft above sea level 132yd eSlope Recommended Distance

PIN FINDER

Hold down the measurement button while you sken the viewfinder left and right, Only the distance to the nearest target of the scanned point is displayed.

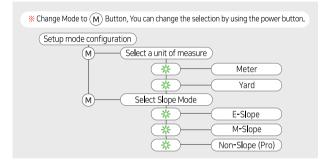

JOLT

When the correct distance is displayed after pressing the measurement button, notifies the completion of measurement through vibration

SET-UP MODE

Press the M button in front of the power button for 1 second to enter Set-up mode, In Set-up mode, change M/Yd, select the function of the slope, and select You can see the temperature, altitude, and humidity of the golf course.

MEASUREMENT UNIT SETTING

Pressing the mode button for 2 seconds enters the mode in which you can set the unit of measurement, and pressing the power button to M/Yd.

SLOPE ON/OFF SWITCHING

After entering Set-up mode, briefly press the (M) button to select the slope function, You can select the power button () to use the e-slope \rightarrow M-slope \rightarrow Non-slope.

REMOTE CONTROL

In order to prevent hand trauma in advance, Minimi introduced a wireless remote control to prevent shaking caused by pressing the button to measure.

After powering on, remove the remote control and press the button on the remote control to display the measurement distance via the viewfinder

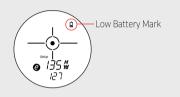

X Attach the remote control to the main body in the same direction as the picture.

The remote control is consumables, When fully discharged, the battery cannot be replaced, You can purchase it at the A/S Center / Caddytalk shopping mall.

CaddyTalk minimi BATTERY REMAINING INDICATION/CHARGE

Low Battery Mark will appear if the remaining battery capacity is less than 20%, and the JOLT function will not run.

Remove the wireless remote control from the main body and charge it with the cable provided on the USB C-type terminal (charging time 90 minutes).

SPECIFICATION

	CADDYTALK MINIMI
	For measuring golf distance
	10~1,200M
	M/Yd
	6X
	E-slope/wireless remote control/IP55 dustproofing, waterproofing
	92 x 58 x 31mm
	135g
	700mAh rechargeable internal battery
	Pure White / Rich Black
	the main body, usb cable , User Guide book, Cleaner
	RNDUS Co.,Ltd. / China
	Product damage compensation is based on the consumer dispute settlement oriteria under the Consumer Basic Law
	2F, 15, Dongnam-ro 4-gil, Songpa-gu, Seoul, Republic Korea / TEL: 1644-6408

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
