

EXHIBIT 2 - EUT INTERNAL PHOTOGRAPHS

**EUT Housing and Board
View 1****EUT Housing and Board
View 2**

Solder Board-Component View 1	 A photograph of a small, circular, black printed circuit board (PCB) component. The board is populated with various electronic components, including a central square chip, several smaller surface-mount components, and a small black cylindrical component on the left. The board is placed on a blue fabric surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component spanning approximately 20mm in width and 15mm in height.
Solder Board-Component View 2	 A photograph of the same small, circular, black PCB component from a different angle. This view shows a large, rectangular, silver-colored component (likely a battery or a large capacitor) mounted on the board. The board is placed on a blue fabric surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component spanning approximately 20mm in width and 15mm in height.

Solder Board-Component View 3	 A photograph showing a small, square, black printed circuit board (PCB) with various electronic components soldered onto it. The components include a small yellow component, a silver component, and several smaller components. The PCB is placed on a blue surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the PCB positioned between the 10 mm and 100 mm marks.
Solder Board-Component View 4	 A photograph showing a small, square, black printed circuit board (PCB) with various electronic components soldered onto it. The components include a small yellow component, a silver component, and several smaller components. The PCB is placed on a blue surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the PCB positioned between the 10 mm and 100 mm marks.

Solder Board-Component View 5	 A photograph showing a small, rectangular, silver-colored component (likely a battery) soldered to a black printed circuit board (PCB). The component has two red wires extending from it. The PCB is placed on a blue fabric surface. A black ruler with white markings is visible in the background, showing measurements in millimeters (mm) and centimeters (cm). The ruler markings are oriented vertically and horizontally.
Antenna View	 A photograph showing the underside of a black PCB. Two antennas are visible: a red antenna labeled "900MHz Antenna" and a black antenna labeled "BLE Antenna". The PCB is placed on a blue fabric surface. A black circular component is also visible on the right side of the PCB.
