

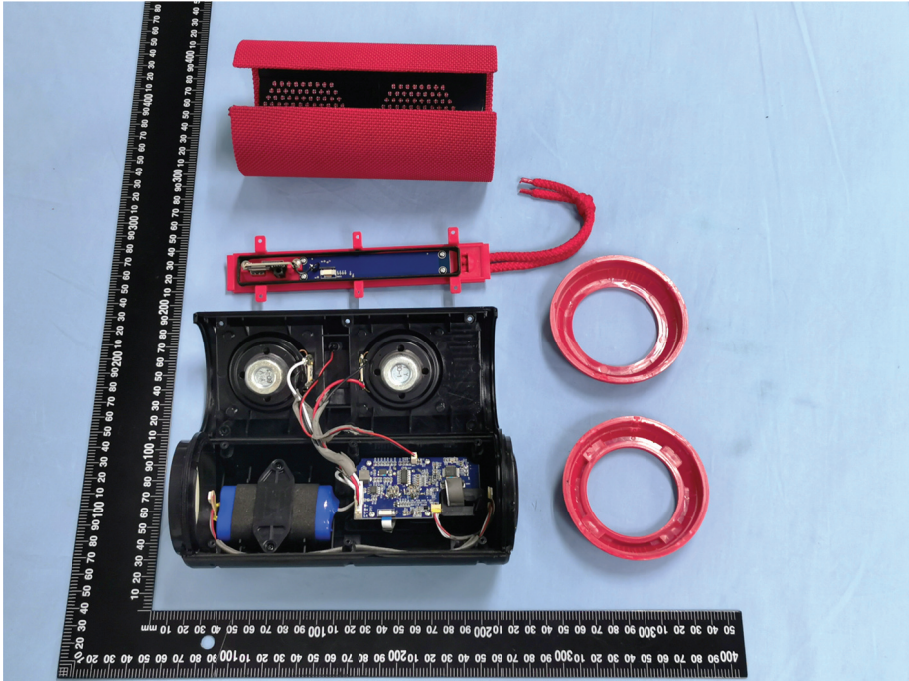

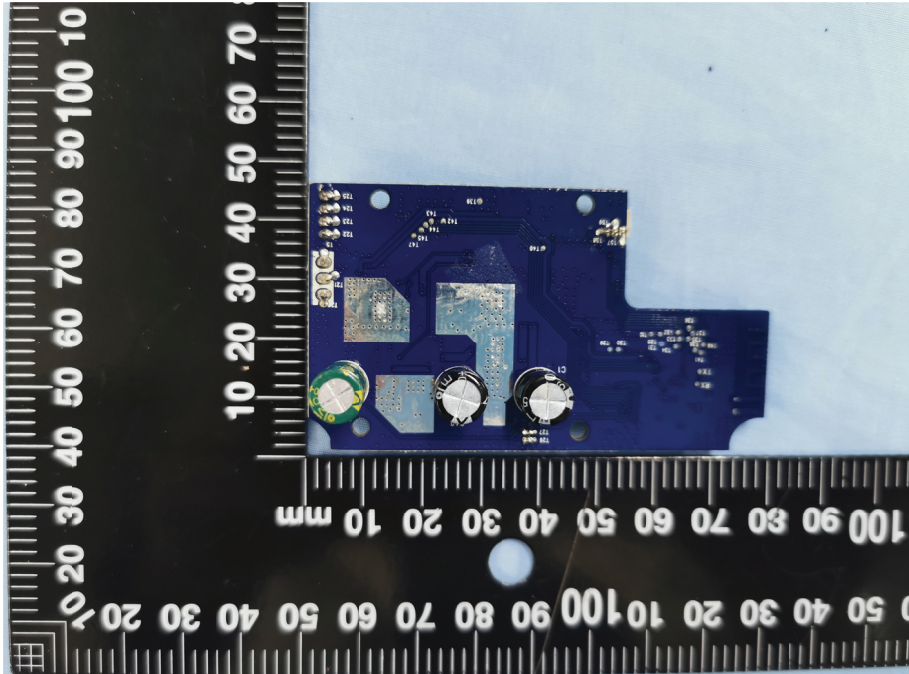

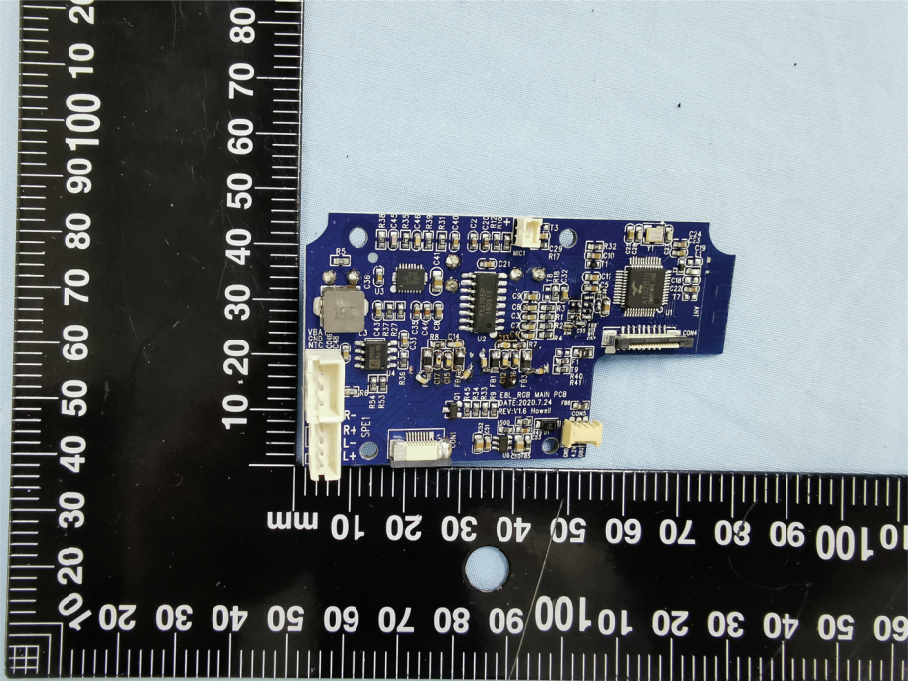

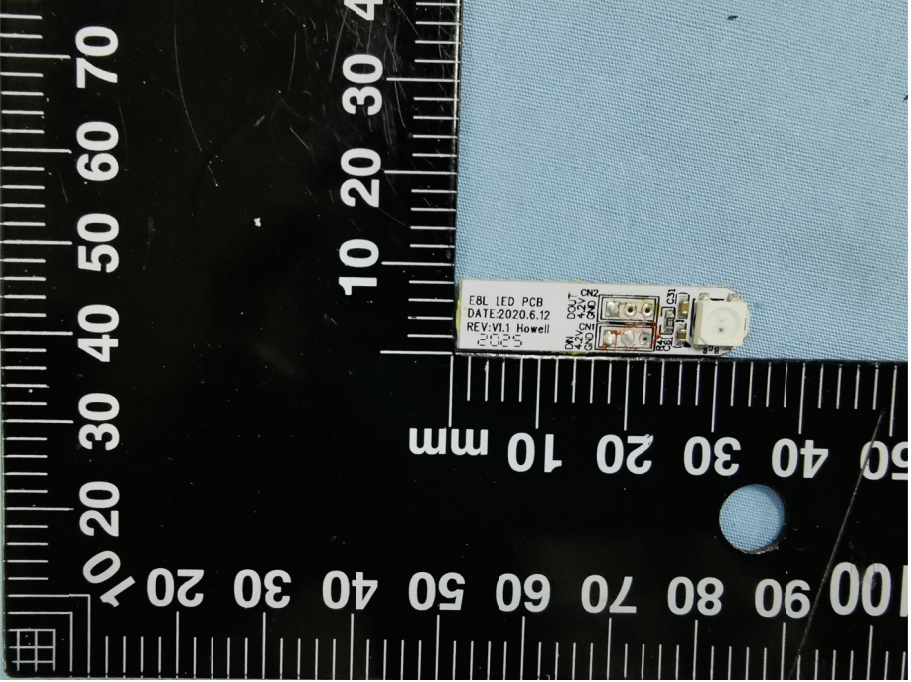

EXHIBIT 2 - EUT INTERNAL PHOTOGRAPHS

<p>EUT Housing and Board View 1</p>	 A photograph showing the disassembled components of an Electronic Under Test (EUT). On the left is the black plastic housing with two circular speaker openings and a blue battery. To the right are the red plastic top and bottom covers, a red ribbon cable, and two red plastic rings. A black ruler with white markings is placed vertically on the left side of the components for scale.
<p>Solder Board-Component View 1</p>	 A close-up photograph of a blue printed circuit board (PCB) with various electronic components. Visible components include a green electrolytic capacitor, a silver electrolytic capacitor, and a small integrated circuit. A black ruler with white markings is placed vertically on the left side of the board for scale.

<p>Solder Board-Component View 2</p>	 <p>A photograph of a blue PCB component, likely a solder mask, placed on a black background with a white ruler. The ruler shows measurements in millimeters, with markings every 10 units and sub-markings every 1 unit. The component is rectangular with a notch on the right side and various electronic components and traces visible. The ruler is oriented vertically, with the 0 mark at the top and the 100 mark at the bottom.</p>
<p>Solder Board-Component View 3</p>	 <p>A close-up photograph of a component, possibly a connector or a small PCB, placed on a black background with a white ruler. The ruler shows measurements in millimeters, with markings every 10 units and sub-markings every 1 unit. The component is rectangular and has a white label with the following text: "EBL LED PCB", "DATE:2020.6.12", "REV:V1.1 Howell", and "2025". The ruler is oriented vertically, with the 0 mark at the top and the 100 mark at the bottom.</p>
