

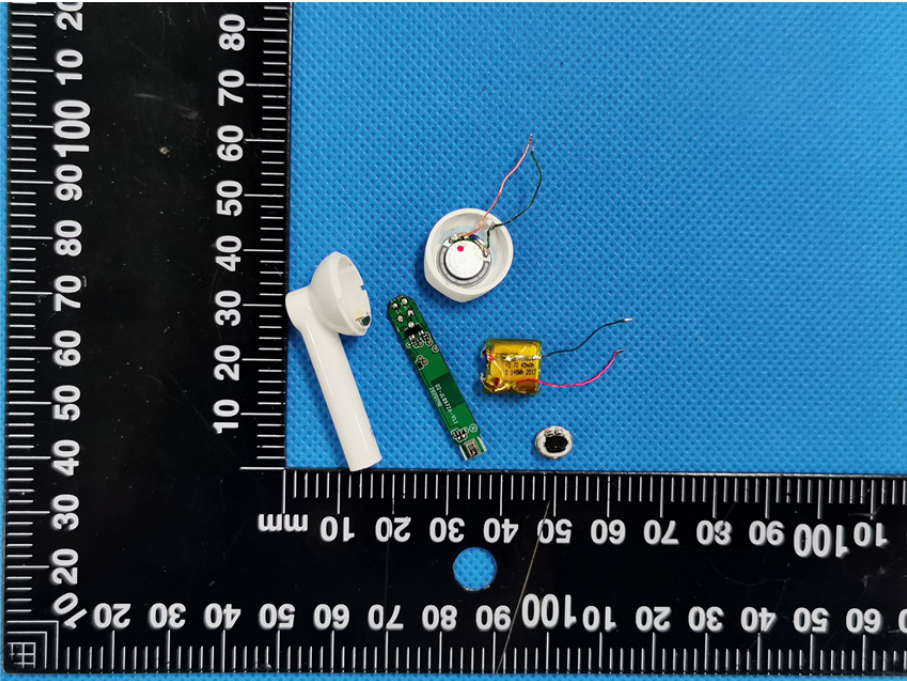

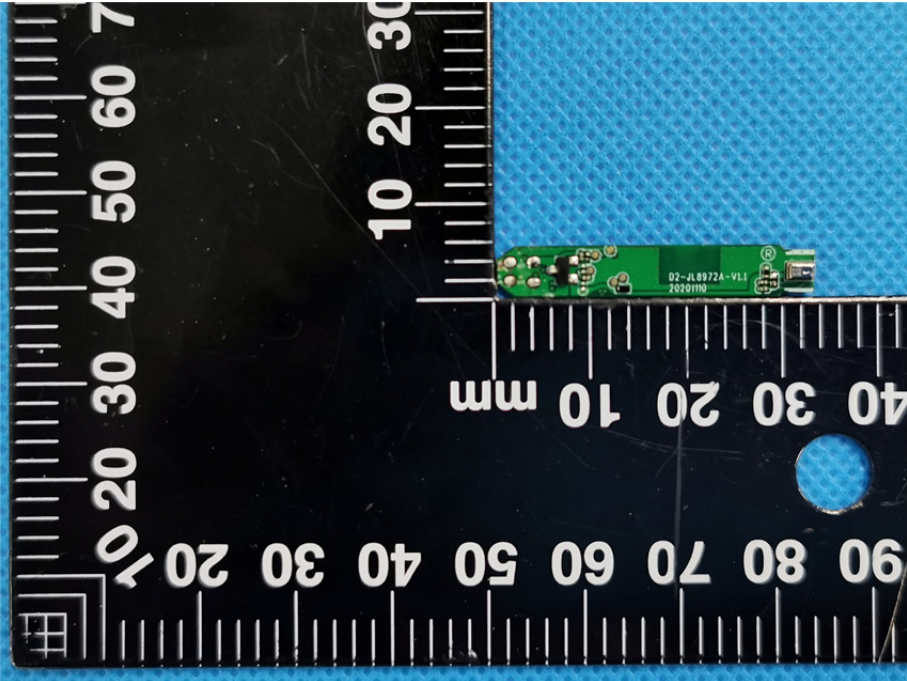

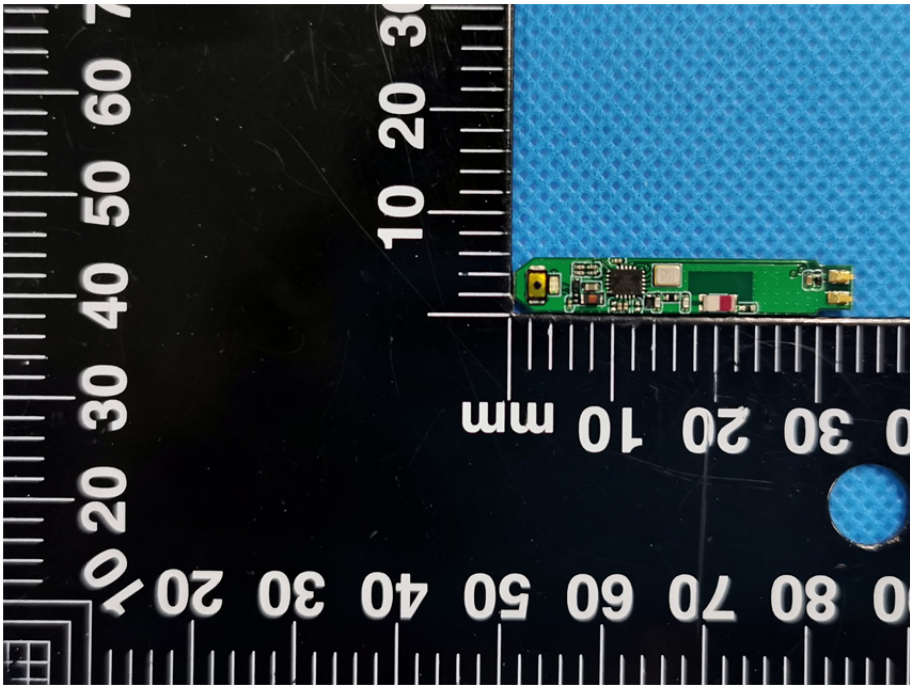

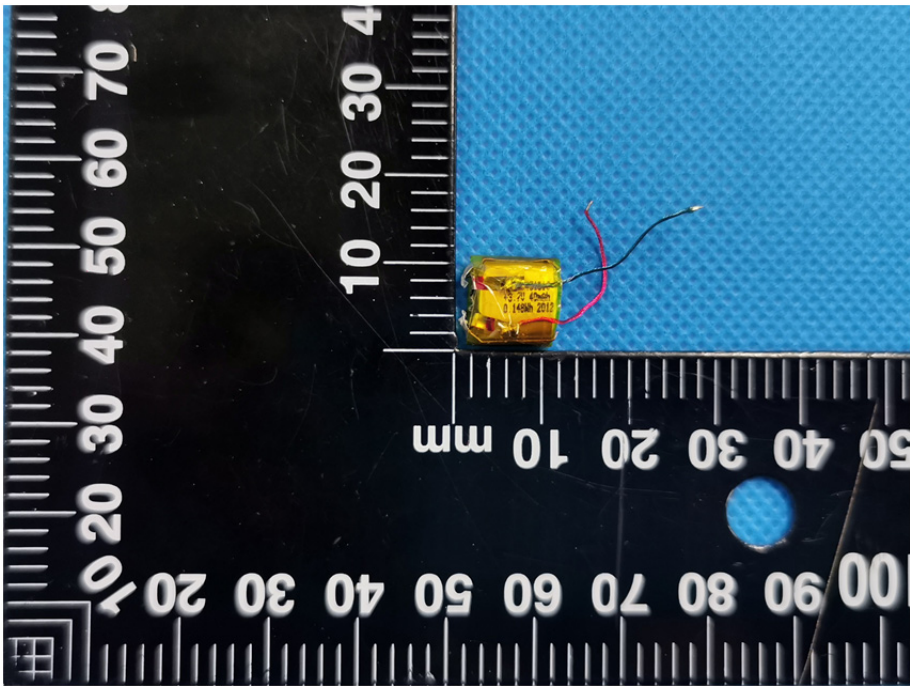

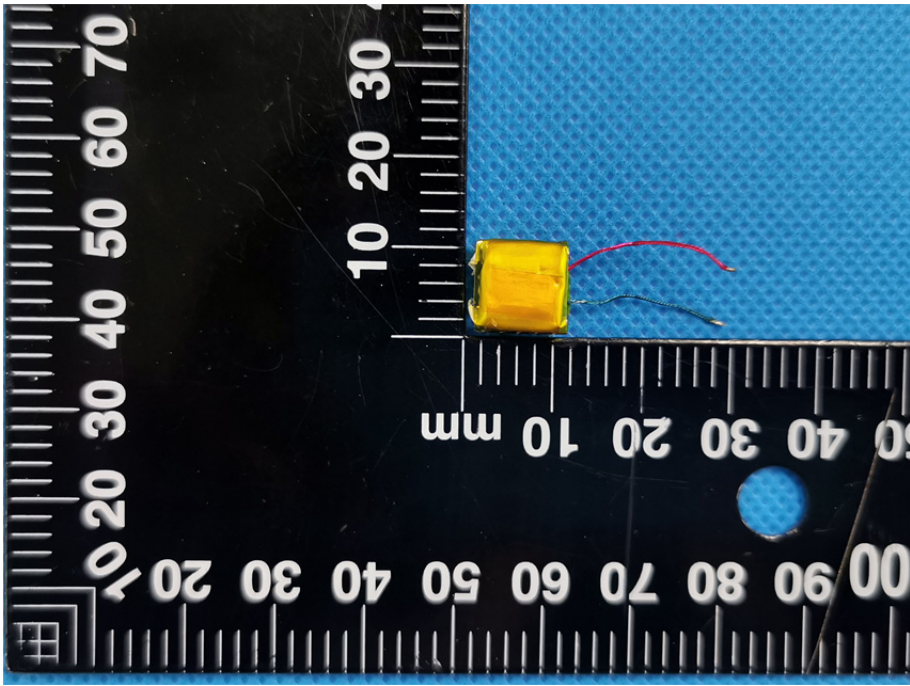

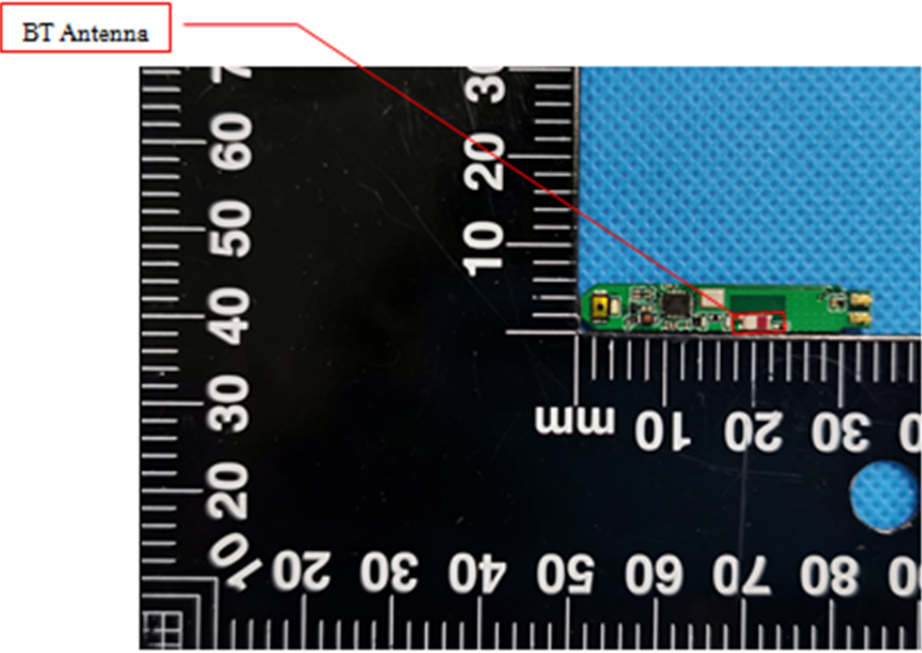

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p>EUT Housing and Board View 1</p>	 <p>A photograph showing the internal components of an EUT. On the left is a white plastic housing. To its right are a green printed circuit board (PCB), a yellow capacitor, a small circular component, and a small metal component. A black ruler with white markings is placed below the components for scale. The ruler shows markings from 0 to 100 mm. The background is a blue textured surface.</p>
<p>Solder Board-Component View 1</p>	 <p>A close-up photograph of a green PCB component. The component is labeled "02-JL8972A-V1.1" and "20201110". It is soldered to a board. A black ruler with white markings is placed below the component for scale. The ruler shows markings from 0 to 100 mm. The background is a blue textured surface.</p>

<p>Solder Board-Component View 2</p>	 A photograph showing a small green printed circuit board (PCB) component with various electronic components (resistors, capacitors, and a microchip) mounted on it. The component is placed on a blue textured surface. A black ruler with white markings is visible in the background, showing measurements in millimeters. The ruler is oriented vertically, with markings from 0 to 70 mm on the left and 0 to 30 mm on the right.
<p>Solder Board-Component View 3</p>	 A photograph showing a small yellow cylindrical component, likely a capacitor, with two thin wires (one red, one black) extending from it. The component is placed on a blue textured surface. A black ruler with white markings is visible in the background, showing measurements in millimeters. The ruler is oriented vertically, with markings from 0 to 70 mm on the left and 0 to 40 mm on the right.

<p style="text-align: center;">Solder Board-Component View 4</p>	 <p>A photograph showing a yellow component soldered onto a blue PCB. The component is a small, rectangular, yellow package with two thin wires extending from it. A black ruler with white markings is placed below the component for scale. The ruler shows markings in millimeters, with the component positioned between the 10 mm and 30 mm marks. The background is a blue textured surface.</p>
<p style="text-align: center;">Antenna View</p>	 <p>A photograph showing a green PCB with a BT antenna component. A red box labeled "BT Antenna" is positioned above the component, with a red line pointing to it. The component is a small, rectangular, green package with two thin wires extending from it. A black ruler with white markings is placed below the component for scale. The ruler shows markings in millimeters, with the component positioned between the 10 mm and 30 mm marks. The background is a blue textured surface.</p>
