2.2 Equipment Approval Considerations

| Requirements of KDB 680106 | Description |
|--|--|
| (1) Power transfer frequency is less than 1 MHz. | Operating frequency is 111 – 129 kHz |
| (2) Output power from each primary coil is less than or equal to 15 watts. | Maximum rated charging power is 15W. |
| (3) The transfer system includes only single primary and secondary coils. This includes charging systems that may have multiple primary coils and clients that are able to detect and allow coupling only between individual pairs of coils. | The device only has a single coil capable of coupling to a single secondary coil in the client device. |
| (4) Client device is placed directly in contact with the transmitter. | The client device has to be placed directly in contact with the charger. |
| (5) Mobile exposure conditions only (portable exposure conditions are not covered by this exclusion). | This device must be powered to operate and therefore is considered a mobile charger, not a portable charger. |
| (6) The aggregate H-field strengths at 15 cm surrounding the device and 20 cm above the top surface from all simultaneous transmitting coils are demonstrated to be less than 50% of the MPE limit. | The highest measured H field was 0.1499 A/m which is 9.2 % of the limit. |

3. RF Exposure 3.1. FCC Regulation

This document is prepared to show compliance with the RF Exposure requirements as required in §1.1310 of the FCC rules and Regulations.

The limit for Maximum Permissible Exposure (MPE), specified in FCC §1.1310, is listed in Table 1-1. According to FCC §1.1310: the criteria listed in the following table shall be used to evaluate the environmental impact of human exposure to radio-frequency (RF) radiation as specified in §1.1307(b).

| Frequency Range (ᢂᡌ) | Electric Field Strength [V/m] | Magnetic Field Strength [A/m] | Power Density [^{mW/cm[*]}] | Averaging Time [minute] | |
|-------------------------|---|-------------------------------------|---|-------------------------------|--|
| | (A) Limits for Occupational / Controlled Exposure | | | | |

3.2. Test Set-up

3.2.1. Isotropic Probe test setup

The measurement probe (EHP-200A) is a regular hexahedron and supports 3-axis (X, Y and Z) isotropic probe.

A: Front of measurement probe

B: Right of measurement probe

C: Rear of measurement probe

D: Left of measurement probe

E: Top of measurement probe

*Bottom of measurement probe is not used to measure RF exposure condition owing to connection with a stick.

At 15 cm distance, measurement isotropic probe was investigated by rotating the probe through various angles for one of the EUT's sides as below.

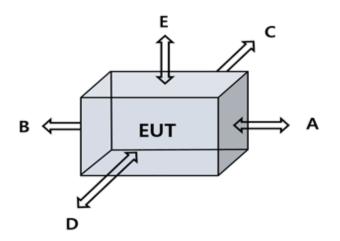

| Measurement Point | А | В | С | D | E |
|-------------------|----------------|---------------|--------------|---------------|-----|
| 15 cm | Front | Right | Rear | Left | Тор |
| Measurement Point | A to B | B to C | C to D | D to A | N/A |
| 15 cm | Front to Right | Right to Rear | Rear to Left | Left to Front | - |
| Measurement Point | A to E | B to E | C to E | D to E | N/A |
| 15 cm | Front to Top | Right to Top | Rear to Top | Left to Top | - |

When the worst angle among all angles was found, RF exposure measurement should be adjusted from worst angle.

65, Sinwon-ro, Yeongtong-gu, Suwon-si, Gyeonggi-do, 16677, Korea TEL: 82-31-285-0894 FAX: 82-505-299-8311 www.kctl.co.kr

3.2.2. EUT test setup

- 1) Testing was performed with a calibrated field probe.
- 2) Measurement was performed on each side of the EUT as described per below table.

| Α | В | С | D | E |
|-------|------|------|-------|-----|
| Right | Left | Rear | Front | Тор |

3) Testing was performed each of test mode.(next page)

To evaluate RF exposure for the mobile operating condition E- and H-fields were measured in accordance with KDB 680106 D01 at 20cm from the top surface and 15cm from all sides.

| Measurement Probe | EHP-200A (Manufacturer: Narda) |
|----------------------|---|
| Measurement Method | 15 cm distance measurement (EUT A, B, C, D) 20 cm distance measurement (EUT E) |
| Measurement Distance | Surface of the EUT to the Center of the Probe. |
