

User Manual

Package

Wireless charger	*1	Type-C cable	*1
Air vent mount	*1	User manual	*1
Suction cup holder	*1		

Functional component

Specifications

Name: M1 WIRELESS CAR CHARGER
 Output power:15W(compatible with 10W, 7.5W, 5W)
 Induction distance: <=5mm
 Car charger requirements: QC3.0 or PD 18W+ car charger
 Applicable mobile phone size:4.7-6.9 inch mobile phone

Direction for use

1. Assemble the product and accessory through a ball head nut and tighten it (compatible with other ball head diameter 17mm accessories), and fix it in an ideal position. Connect the product

to the QC3.0 car charger (optional) with the data cable, and insert to the cigarette lighter to get electricity.
 2. After the product is powered on, the indicator light is always on, and the left and right telescopic arms will automatically open after 5 seconds
 Wait for the mobile phone to be placed; (if there is a mobile phone on the bracket, the clip will not be opened, and the bracket will directly give phone charging)
 3. In order to ensure the efficiency and stability of charging, the optimal distance for wireless charging is 4.5mm or more. It does not penetrate metal, so avoid using metallic or thicker ones (greater than 4.5mm) mobile phone protective case, so as to ensure fast wireless charging of mobile phones.
 4. After placing the mobile phone, the left and right clamping arms will automatically clamp the mobile phone. If the mobile phone supports Qi wireless charging Electric protocol, coil electric intelligent induction, automatically find the best charging position of the mobile phone and start wireless charging at the same time (this product supports charging Samsung Z-FILP phones). The indicator lights breathe when charging starts; if the phone does not support wireless charging, the indicator light flashes quickly for 5 seconds and then goes off (there may be some mobile phones without wireless charging function that cannot be sensed by this product, need to press side buttons to clamp the phone).
 5. Way to remove the phone:
 Press any of the left and right side buttons, the left and right clamp arms will automatically open, and the mobile phone can be removed; the clamp arms will remain open. (If taking out the phone when the power is off, you need to press the side buttons within 5 minutes)
 6. If the product does not light up after the power on (no light or flashing indicate that the product has a problem), press the key fails, the wireless charging does not work, the clip does not open or close, please stop using and return to seller for processing when the above situation shows.

Suction cup holder

Place the suction cup on a suitable flat position, adjust the angle and press the button to lock the suction cup firmly onto the flat surface. After fixing, the angle and the front-to-back distance can be adjusted at will. TPU suction cup + glue double adsorption, one key to lock.

Air vent mount

Adjust the position of the top piece of the air outlet and the rotatable clip assembly according to the position of the air outlet blade; insert the blade and select the lock switch position according to the thickness of the blade; suitable for one-key locking of the air outlet of most cars. Silicone touches the car, tighter and fits better to protect the car from scratches.

Precautions

1. Do not use the product in the car at a temperature above 60 degrees.
2. Do not use this product in professional racing or extreme off-road driving.

The guarantee

Products three guarantees valid time:From purchasing date (Prevail to the customer receipt date or invoice date),provide 12 months guarantee. Product surface man-made damage,accessories missed are not include in this guarantee. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
