### Package

Wireless charger	*1	User manual	*1
Type-C cable	*1	Air vent mount	*1
Adjustable suction cup mount			*1
Rotatable 3M mount (Optional)			*1
Car charger adaptor (Optional)			*1

### Functional component

### Specifications

Model No.: SAHARA  
 Name: wireless charger car holder  
 Output power: 15W (compatible with 10W, 7.5W, 5W)  
 Induction distance: < 8mm  
 Car charger requirements: QC3.0 car charger  
 Applicable mobile phone size: 4.7-6.9 inch mobile phone

### Direction for use

1. Assemble the product and any accessory through a ball head nut and tighten it (compatible with other ball head diameter 17mm accessories), and fix it in an ideal position. Connect the product to the QC3.0 car charger (optional) with the data cable, and insert to the cigarette lighter to get electricity.
2. After the product is powered on, the indicator on the right side will turn on blue, and the left and right telescopic arms will automatically open after 5 seconds to wait for the mobile phone to be placed; if the product does not turn on red after power on (not turn on, flash or turn on other color lights) All indicate that there is a problem with the product, please stop using it and return it to the seller for processing).
3. In order to ensure the efficiency and stability of charging, before putting the phone on, adjust the bottom bracket position of the stand and try to align the center position of the back of the phone with the "X" symbol on the stand panel as much as possible. Cell phones of different sizes should correspond to different Stalls. The best distance for wireless charging is within 3-5mm and cannot penetrate metal, so it is necessary to avoid using metal or too thick (greater than 3mm) mobile phone protective shells to ensure fast wireless charging of mobile phones.
4. After placing the phone, the left and right clamping arms will automatically clamp the phone. If the phone supports Qi wireless charging protocol, the product will start wireless charging at the same time, and the indicator light turns blue when the product wireless charging starts; if the phone does not support wireless charging, the light goes out. The maximum charging power of this product is 15W, and the charging efficiency will vary according to the charging environment and mobile phone.

### Suction cup holder

Place the suction cup on a suitable flat position, adjust the angle and press the button to lock the suction cup firmly onto the flat surface. After fixing, the angle and the front-to-back distance can be adjusted at will. TPU suction cup + glue double adsorption, one key to lock.

5. When the product is powered on, you can open the clamp arms by pressing any button on both sides of the product to remove the phone; after removing the phone, the indicator will immediately show a red light standby state. (The buttons on both sides of the product can be clamped or opened with any one key.)
6. When the product is turned off and the product stops supplying power, if the mobile phone is still on the holder, the holder will issue an alarm 5 times within 2 seconds to remind the user to remove the mobile phone. (The built-in super capacitor is powered off for 5 minutes. You can press the side button to open the arm to take away the phone.)

### Air vent mount

Not suitable for circle air vent!

Adjust the position of the top piece of the air outlet and the rotatable clip assembly according to the position of the air outlet blade; insert the blade and select the lock switch position according to the thickness of the blade; suitable for one-key locking of the air outlet of most cars. Silicone touches the car, tighter and fits better to protect the car from scratches.

### Rotatable 3M holder

Wipe clean the place to be pasted, tear off the protective tape at the bottom of the 3M glue, and paste it in a suitable place. Please press it and let it stand for 48 hours before fully tightening it before use. After the holder is fixed, it can be 360° Rotated to adjust the angle. The car arc can also be glued and fastened.

### CC Warning statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note:  
 This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC RF exposure statement:

This equipment complies with FCC Radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the product and your
