

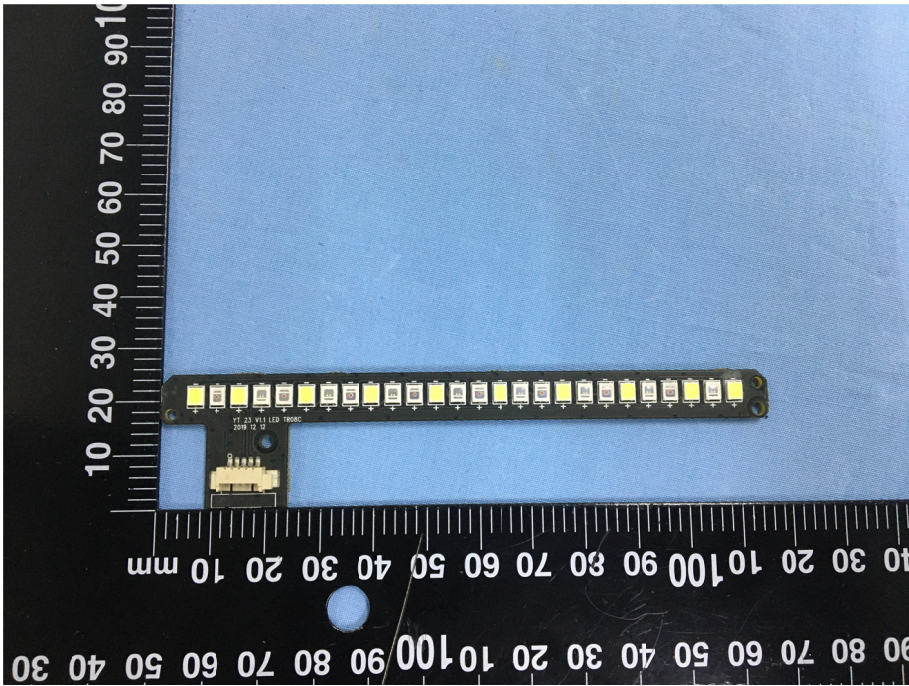

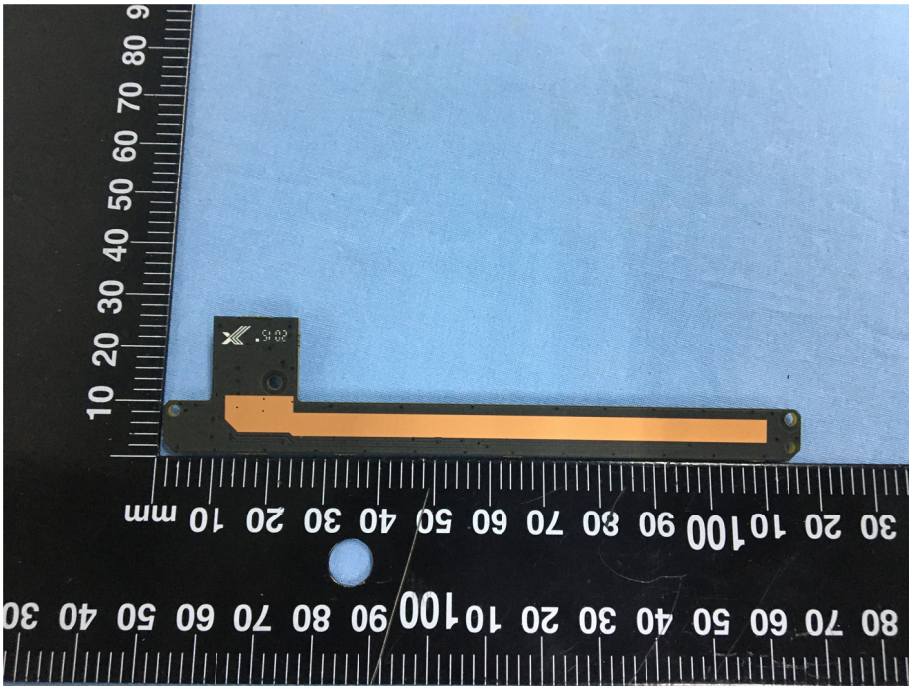

EXHIBIT 2 - EUT INTERNAL PHOTOGRAPHS

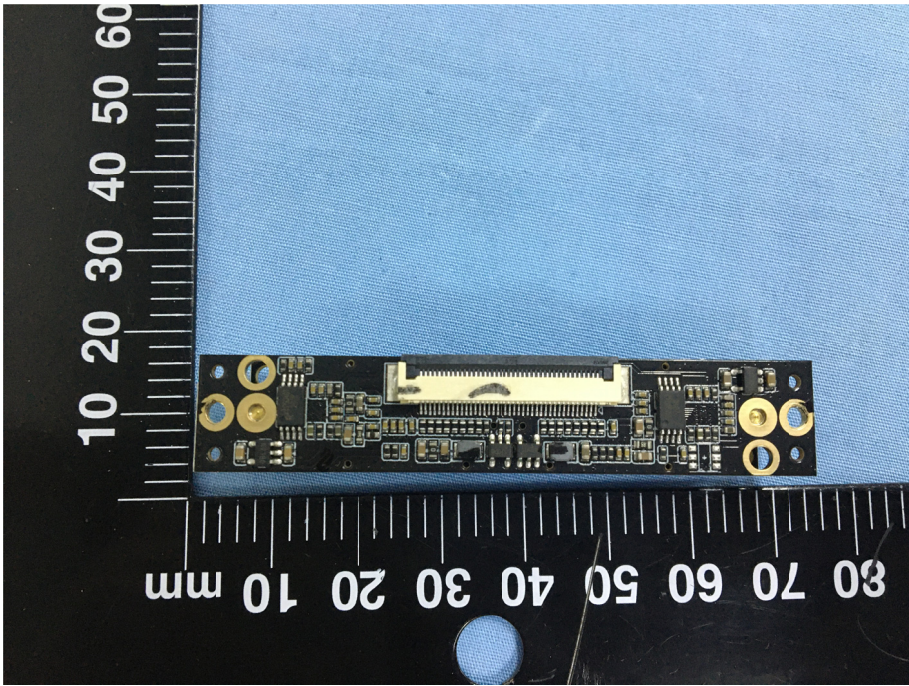

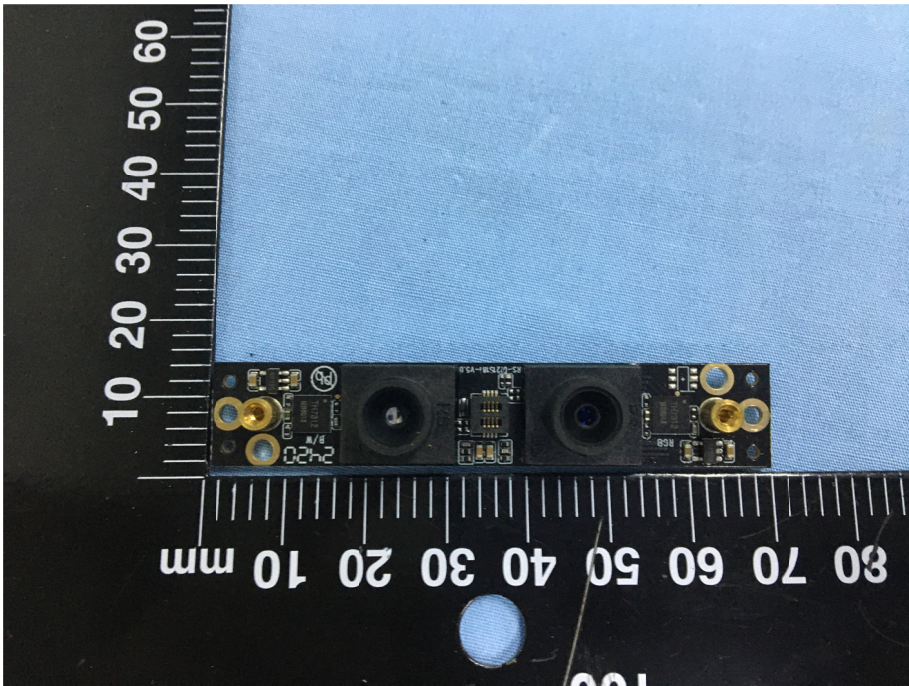

**EUT Housing and Board
View 1**

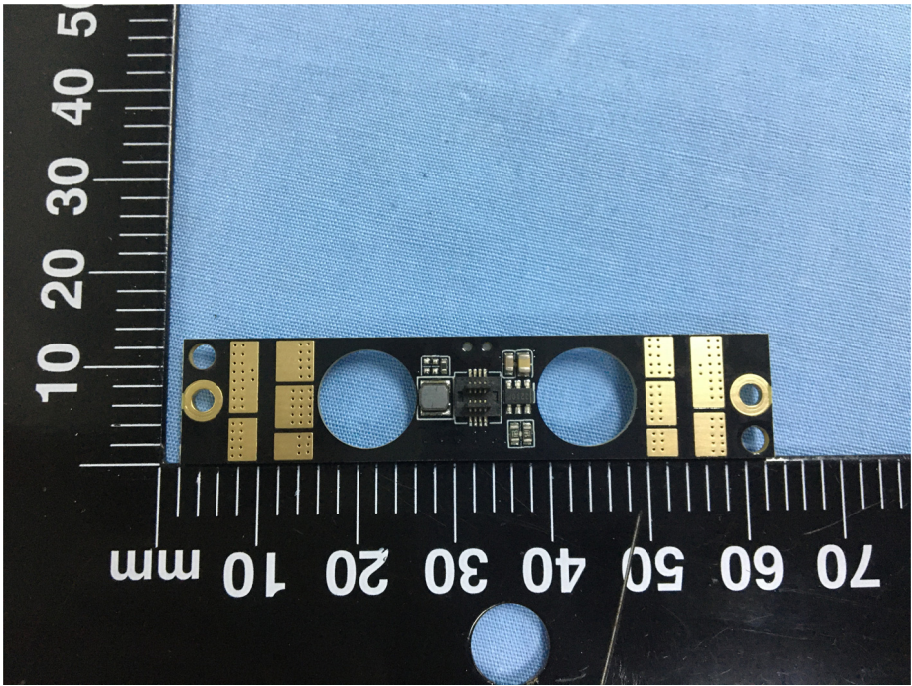

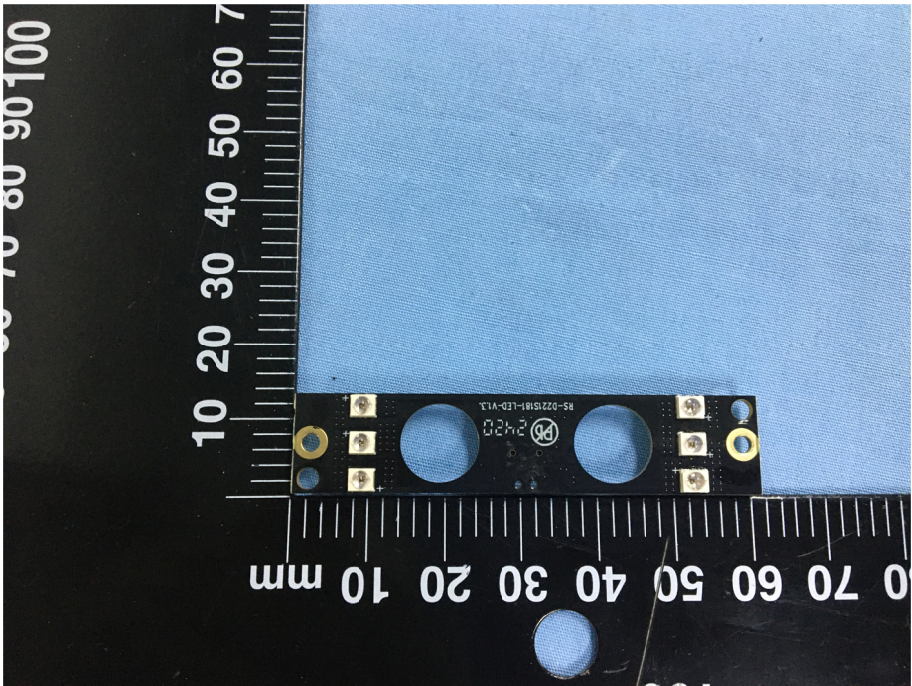

**EUT Housing and Board
View 2**

<p style="text-align: center;">Solder Board-Component View 1</p>	 <p>A photograph showing a black printed circuit board (PCB) component with a row of 16 small, yellowish LEDs along its top edge. The component is positioned on a blue fabric surface. A black metric ruler is placed below the component, showing measurements in millimeters. The ruler has markings every 1 mm, with larger numbers every 10 mm (10, 20, 30, 40, 50, 60, 70, 80, 90, 100). The component is approximately 100 mm long and 10 mm wide.</p>
<p style="text-align: center;">Solder Board-Component View 2</p>	 <p>A photograph showing the same black PCB component from a different perspective. The component is positioned on a blue fabric surface. A black metric ruler is placed below the component, showing measurements in millimeters. The ruler has markings every 1 mm, with larger numbers every 10 mm (10, 20, 30, 40, 50, 60, 70, 80, 90, 100). The component is approximately 100 mm long and 10 mm wide. The top edge of the component is visible, showing a small white label with a logo and the number '2015'.</p>

<p style="text-align: center;">Solder Board-Component View 3</p>	 <p>A photograph of a small, rectangular printed circuit board (PCB) component. The board is black and populated with various electronic components, including a central integrated circuit (IC) with a gold-colored connector on its top edge. There are four gold-plated circular pads on the board, two on each side. The component is placed on a black surface with a white ruler for scale. The ruler shows millimeter markings from 0 to 80 mm. The component's length is approximately 75 mm and its width is approximately 15 mm. The background is a light blue fabric.</p>
<p style="text-align: center;">Solder Board-Component View 4</p>	 <p>A photograph of the same PCB component from a different perspective. This view shows two circular components, likely lenses or sensors, mounted on the board. The board is populated with various electronic components, including a central IC and several smaller components. There are four gold-plated circular pads on the board. The component is placed on a black surface with a white ruler for scale. The ruler shows millimeter markings from 0 to 80 mm. The component's length is approximately 75 mm and its width is approximately 15 mm. The background is a light blue fabric.</p>

<p style="text-align: center;">Solder Board-Component View 5</p>	 <p>A photograph of a black PCB component with gold-plated pads and two circular cutouts. The component is placed on a black ruler with white markings. The ruler shows a vertical scale from 0 to 50 mm and a horizontal scale from 0 to 70 mm. The component is oriented horizontally, with the ruler's vertical scale on the left and the horizontal scale at the bottom.</p>
<p style="text-align: center;">Solder Board-Component View 6</p>	 <p>A photograph of the same black PCB component from a different angle. The component is placed on a black ruler with white markings. The ruler shows a vertical scale from 0 to 100 mm and a horizontal scale from 0 to 70 mm. The component is oriented horizontally, with the ruler's vertical scale on the left and the horizontal scale at the bottom. The component's top surface is visible, showing a central chip and various pads.</p>
