

## 1 Technical Parameters

| Design Specification | Typical                  | unitis |
|----------------------|--------------------------|--------|
| Form                 | Integrated Patch Antenna |        |
| Frequency            | 60-64                    | GHz    |
| Gain                 | 6                        | dBi    |
| Antenna Efficiency   | 80                       | %      |
| VSWR                 | 1.11                     |        |
| Polarization         | vertical polarization    |        |
| Radiation pattern    | broad beam               |        |
| Impedance            | 50                       | ohm    |
| Power handing        | -42                      | dBm    |
| Overall dimensions   | 1.6mm*1.315mm            |        |
| Operation Temp       | -40-70                   | °C     |
| Storing Temp         | -40-70                   | °C     |

## 2 Antenna simulation pattern

### 2.1 Aimuth

### 2.2 Pitching
