TROUBLESHOOTING

When your phone can not be charged properly (when the indicator light of the wireless charger is flashing), please remove the phone, wait until the charging logo of the phone disappears and the indicator light of the wireless charger stops flashing, and then put the phone on the wireless charger in the correct position.

To quickly charge the phone, a QC3.0/PD adapter is required.

Wireless Charging Stand

F3

INFLUENCE FACTORS	SOLUTIONS
Device Model	Check if your phone is compatible, refer to the COMPATIBILITY list.
Position	Make sure the center of the back of the phone is aligned with the "+".
Adapter and Charging Cable	Please use certified QC 3.0/PD adapter to charge the device. Do not plug into computer USB port or any other non-certified USB port. The adapter and the charging cable must be firmly connected. Try to reconnect the adapter and charging cable. If the problem persists, try a different adapter (9V/2A/ 12V/ 1.5A) and charging cable.
Protective Case	The thickness of the protective case (non-metallic) should not exceed 0.2mm (0.008"). The size of the phone with the case should not exceed 6.45in (164mm).
Interference	Try to remove the case and check again. Magnetic/ Metal Attachments (such as credit cards, keys, etc.) will interfere the charging.

INFLUENCE FACTORS	SOLUTIONS
Temperature	Do not use this product in a high temperature environment or expose it to rain or snow. It is normal and safe to hear a humming noise when very close to the charger. It means that the wireless charger is adjusting its temperature to achieve a more efficient charging speed. If your device can not be fully charged, this may be due to high environmental temperature, please recharge after the temperature is lowered.
Defective Product	Please contact us through Amazon for technical support following the steps below if the issue remains. 1. Go to Your Orders. 2. Find your order in the list. 3. Select Problem with order. 4. Choose your topic from list displayed. Select Contact seller.

CAUTION

- * Do not store device in high-temperature environment, including heat caused by intense sunlight or other forms of heat. Do not place device in fire or other excessively hot environments. Exposure to fire or temperature above 212°F(100 °C) may cause explosion.
- * Do not use the wireless charger in excess of its output rating. Overloading outputs above rating may result in a risk of fire or injury to persons.
- * Do not expose the wireless charger to rain or snow.
- * Do not modify, repair or disassemble the unity. If so, please contact the manufacturer.
- * Switch off the wireless charger when not in use.
- * The wireless charger will automatically switch off when disconnected from its wall charger.
- * Make sure to disconnect the device from power when cleaning.

Thank you for choosing our product

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.
