

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a piece of electronic equipment, likely a spectrum analyzer or a noise meter, sits on a light-colored wooden table. A black cable runs from the equipment down to a power supply unit on the floor. The power supply unit is a grey, rectangular device with a red emergency stop button and several ports. It is connected to a wall outlet. To the right, another wooden table is visible, with a small, clear plastic container on top of it. The background is a plain, light-colored wall.
Radiation Emission Test Setup (Below 30MHz)	 A photograph showing a radiation emission test setup. In the center, a yellow, rectangular test chamber is placed on a grey floor. A blue metal frame stands in front of the chamber. The walls of the test chamber are lined with white, square-shaped absorbers. The floor is marked with yellow and black diagonal stripes. The background is a blue wall.

Radiation Emission Test Setup (30MHz to 1GHz)

**Radiation Emission Test
Setup (1GHz to 18GHz)**
