- The Receiving Collar will go into Standby Mode if it's idle for more. than 5 mins. Any movements will activate the Receiving Collar.
- The Transmitter will go into Standby Mode ( will be light off with 30s will be light off with 1min)

   will be light off with 1min)
- Press 10 10 4 button to re-activate it from Standby mode. 8. The Remote Transmitter can be used to control up to 4 Receiving
- 9. 2 pairs of metal contacts (1 short and 1 long) are included to suit the
- length of your dog's hair.

10. The Transmitter with lock key function.

## How does the Rechargeable and Waterproof Dog Training Collar Work

The Rechargeable and Waterproof Training Collar has been proven to be a safe, comfortable, and effective training system for all dogs weighing over 15lbs. This system allows you to control your dog within a range up to 2000 feet. At the press of a button, the Remote Transmitter sends signal to the Receiving Collar and activates a Beep, a Vibration or a Static Shock correction output. By using the Training Collar properly, you can correct much of your dog's undesired behavior and teach basic and advanced

Important: the Training Collar has an effective range up to 2000 feet. Hold the Remote Transmitter horizontally away from your body to achieve the optimum range. Terrain features, weather, vegetation, transmission from other radio devices and other factors may affect the range of the Remote Transmitter

## Precautions

DO NOT use this product for aggressive dogs or vicious animals.

It's important to fit the collar properly. A collar that is fitted too tightly or worn for too long may harm your dog's skin. This condition, which ranges from radnace to procesure silicare, is commonly known as had enrac-

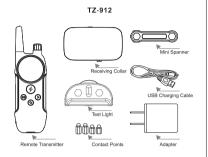

## CAUTION

- . Do not let your dog wear the collar for more than 12 hours per 24-hour
- If possible, gently reposition the collar on your dog's neck every 1 or 2.
- Never attach a lead to the Receiver Collar, as this would cause excessive pressure on the contact points
- . When using a separate collar to connect a leash, please ensure that it does not put excessive pressure on the electronic collar.
- Examine your dog's neck daily for signs of chafing or soreness
- If a rash or sore is found, stop using the collar till the injured skin has
- . If the condition persists for more than 48 hours, consult your veterinarian. . If possible, please use the Beep Mode or Vibration Mode at first, then can
- try Static shock function Please ensure that you charge both the Receiving collar and the Remote

Transmitter before using! To extend the battery life of this product, please charge them per month if

you do not intend to use it for a long period of time

 Ensure that the Remote Transmitter has adequate power.
 Remote Transmitter will automatically go into Standby Mode if it is idle for innih No LED light will be illuminated at this time. Press any button to re-activate the Remote Transmitter.

## General Tips for Training Your Dog

 Eliminate one behavioral problem or teach one command at a time. If you
move too fast with the training, your dog may become confused.
 Be consistent. Give your dog a single Beep, Vibration, or Static Shock for each misbehavior . • Do not over-correct your dog. Use a few stimulations as possible during

training.

Unless you can supervise him ther, it is recommended that you restrain your dog from environments in which het is the lass a history of misbehaving. However, setting up a training assistion in this case can direntalizely improve your chances of success.

If your dog reads to the training by hiding or acting fearfully, redirect his/her attention to a simple and appropriate behavior, such as the 'Stiff her attention to a simple and appropriate behavior, such as the 'Stiff

## FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- -Reorient or relocate the receiving antenna.
- -Increase the separation between the equipment and receiver.
- -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- -Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.
