Software Download

To use your Revopoint POP 3 3D Scanner, you must first download the Revo Scan software. You can download it from Revopoint's website for Windows and macOS systems. And for Android or iOS smartphones, search for "Revo Scan" in the Google Play or Apple App Store.

To learn more about Revo Scan's functions, please check out the user manual in Revo Scan.

Scanning Dark, Transparent, or Reflective Objects

Like most 3D scanners, the POP 3 will struggle to scan transparent, reflective, or black objects without first lightly coating the object's surface with scanning spray, baby powder, or dry shampoo.

Hard-to-scan Surfaces

Surface Features	Possible Solutions
Black or very dark objects	Apply scanning spray or fine powder materials
Shiny or reflective objects	Apply scanning spray or fine powder materials
Metal or electroplated surfaces	Apply scanning spray or fine powder materials
Transparent objects	Apply scanning spray or fine powder materials

Scanning Objects with Plain Surfaces

Scanning objects with simple geometric features, like a football or wine bottle, requires using Marker stickers or marker points and scanning in Marker Mode.

1. Place the Marker stickers on or around the objects' surface irregularly and ensure there are at least 5 Marker stickers per frame for the entire scan, or the scanner will lose track.
2. Alternatively, reference objects (these are any objects with distinct features that can be easily tracked) can be used. Place 1 to 3 reference objects around the item you are scanning for the 3D scanner to track. If doing this, you can use the scanner in Feature tracking mode for the scan.

Please scan the QR code to watch a Marker stickers video tutorial.

Color Scanning

For optimal color scanning, please ensure that the object is evenly lit with soft light and that there are no dark or hard shadows.

About POP 3

The POP 3 is the next-gen 3D scanner from the POP series with new and improved hardware, design, and usability. The improvements in POP 3's capabilities offer more possibilities for 3D printing, 3D animation design, reverse engineering design, product design, medical health, digitizing historical items, VR/AR, and more.

14. Turntable USB Cable

POP 3 on Windows or macOS Devices

Both Windows and macOS computers are compatible.

System Requirements

Windows: Win 10/11 (64-bit)

Windows 7 is not supported.

Memory: ≥8GB

Processor: Intel Core i5 or better

Mac with Intel × 86 chip: macOS 10.15 and models after

Mac with Apple M1 chip: macOS 11.0 and models after

Memory: ≥8GB

* Minimum PC Display Screen Resolution: 1344×768 (1920×1080 is recommended).

Connection Methods

	Windows	macOS
USB Mode	√	√
Wi-Fi Mode	√	√

Connecting POP 3 to a PC via USB

Step 1: Screw the Quick Mount Kit onto the Tripod.

Step 2: Clip the POP 3 to the top.

Step 3: Connect the USB cable's Type-C end to the POP 3's rear port.

Step 4: Plug the Type-A end into a USB 3.0 port or above on your computer.

Step 5: Open Revo Scan on your computer.

Windows or macOS

Notes:

1) Connect the POP 3 to a USB 3.0 port or above (USB 2.0 will not supply sufficient operating power.) Ensure your USB 3.0 port is not damaged or worn out.

2) If there is no Type-A port on your computer, use the Type-C Adapter.

Windows or macOS

Connecting POP 3 to a PC via Wi-Fi

Step 1: Power the POP 3 with the Power Bank Handle or an AC adapter.
(Note: Do not plug it into your PC; it will be in USB mode by default.)

Step 2: Connect the PC to the POP 3.

- 1) Go to your Wi-Fi setting, search for the network called POP 3-XXXXXX and connect (No password is required).
- 2) Wait a few seconds for the scanner to connected.

Windows or macOS

Step 3: Open Revo Scan on your computer.

POP 3 on Smartphones

Android devices can connect via either USB or Wi-Fi. However, iOS devices only support Wi-Fi.

System Requirements

Android: \geq Android 9.0
Harmony OS is supported.
RAM: \geq 6GB

iPhone: iPhone 8 Plus or models after
iPad: 6th generation iPad or models after
System Version: \geq iOS 13.0

Connection Methods

	Android	iOS/iPadOS
USB Mode	√	×
Wi-Fi Mode	√	√

Connecting POP 3 to Android Phones via USB

Step 1: Screw the Phone Holder onto the Power Bank.

Step 2: Clip the POP 3 to the top of the Phone Holder.

Step 3: Pull open the Phone Holder's clamps and fit your smartphone.

Step 4: Connect the 2-in-1 Mobile Cable's Type-C end to the POP 3's port, Type-A to the Power Bank, and Type-C to an Android smartphone.

Connecting POP 3 to Phones via Wi-Fi

Both Android and iOS Phones are compatible.

Step 1: Power the POP 3 on via the Power Bank Handle or a Socket.

- 1) Powered by a Power Bank.
- 2) Powered by a Socket.

Power Bank Handle

Socket

Step 2: Connect the Smartphone to the POP 3.

- 1) Go to your smartphone's Wi-Fi setting, search for the network called POP 3-XXXXXX and connect (No password is required).
- 2) Wait a few seconds for the scanner to be connected.

Android or iOS

Power Bank Handle

Or

Step 3: Open Revo Scan on your phone.

Note: If you have an iPhone, and want to use the 2-in-1 Mobile Cable to scan, it works like this:

Appendix

Specifications

Product Name	POP 3 3D Scanner
Technology	Biocular Dual Camera Infrared Light
Single-frame Precision	Up to 0.05mm
Single-frame Accuracy	Up to 0.1mm
Single Capture Range	125mm x 225mm
Working Distance	150mm - 400mm
Minimum Scan Volume	20mm x 20mm x 20mm
Scanning Speed	Up to 12fps
Light Source	Class 1 Infrared Light
Tracking Methods	Feature, Marker
Color Scanning	Yes
Output Formats	PLY, OBJ, and STL
Point Distance/ Resolution	0.1mm
Special Object Scanning	Use scanning spray for transparent, dark, or highly reflective objects.
Scanning Environment	Indoors and Outdoors
Outdoor Scanning	The POP 3 cannot scan objects well in direct bright sunlight.

POP 3 Quick Start Guide

Scanner Dimensions	153mm x 45mm x 29mm
3D Printing Compatible	Yes
Compatible OS	Windows, Android, iOS, macOS
Buttons	Three touch buttons.
Button Functions	Start/Pause scanning, adjusting exposure
LED Indicators	Connection indicator shows the connection status.
	Power indicator shows the power status.
PC Display Screen Resolution	>1344x768 (1920×1080 is recommended)
Wi-Fi	Wi-Fi 6
Connection Port	USB Type-C
<p>Note:</p> <ol style="list-style-type: none">1. Accuracy was acquired in a controlled lab environment. Actual results might vary, subject to the operation environment.2. Windows 7 is not supported.3. iOS devices only support Wi-Fi connection.4. Class 1 Laser: Avoid direct eye exposure for extended periods! Refer to Standards for Class 1 Lasers for details.

Solid green light: Started Successfully

Updating the Firmware

A pop-up will notify you when you connect your POP 3 to Revo Scan if a firmware update is available. If you want to update your firmware, follow the install wizard's prompts and ensure your POP 3 has a stable power supply.

Scanner Calibration

Your POP 3 3D Scanner was calibrated in the factory and only needs to be recalibrated after a year of use or if the scanned results do not match the specified accuracy.

Maintenance Instructions

1. Small parts, such as markers, are dangerous if swallowed. Keep all components out of reach of children and animals to avoid serious injury to them.
2. Store the scanner and all accessories in a cool, dry place away from direct sunlight.
3. Do not allow the scanner to come into contact with or become

immersed in water or other liquids. Wipe it with a soft, absorbent cloth if it gets wet. Operating a scanner that has gotten wet may cause permanent component damage.

4. Keep the cameras and projector (the two IR cameras, one RGB camera and a projector) clean. Use 95% isopropyl alcohol and a soft cloth to clean them.

5. Handle the scanner with care to avoid hitting the cameras.

6. The operating temperature POP 3 of this product is 0°C to 40°C (32°F to 104°F).

7. Do not disassemble the scanner. If there are any problems or questions, contact the Revopoint customer service team at customer@revopoint3d.com.

Customer Service

If you need any assistance with your scanner, please don't hesitate to contact us at customer@revopoint3d.com or drop us a line at +1 (888) 807-3339 or chat with one of our customer service agents online on our website at www.revopoint3d.com. Click the speech bubble on the bottom right corner of the screen.

Warning

The product cannot be returned
if the "**Warranty Void If Seal Is Broken**"
label is damaged or removed.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
