

## SOLAR FM TRANSMITTER

USER'S MANUAL  
MODEL: VM-223

1

Thank you for choosing VM-223 Solar FM Transmitter which is dedicated for cars. This product uses a high-performance Bluetooth module and audio decoding chip, supports AUX input and comes with a remote control, supports Type-c cable and solar charging. Not only it can connect the music from the mobile phone to the car stereo through Bluetooth, it can also play music files in flash drive or TF card and transmit it to the car stereo wirelessly. Built in hands-free phone call system switches between music and incoming calls seamlessly and enables you talk on the phone freely. Remote control can be glued to the steering wheel and makes it convenient for you to activate the voice assistant, answer the phone and switch songs etc. while driving. This product works by means of wireless transmissions, so you can keep the original classic setting of your car and still enjoy music on the road.

### Safety Guide

- (1) Do not drop, puncture or disassemble this product.
- (2) This product is not waterproof, please do not expose it to rain or water splashing.

3

opening or vehicle power on, the device will automatically wakes up.

### Descriptions

### Device

- ① LED Display
- ② Mode Light
- ③ Switch
- ④ AUX In Port
- ⑤ Microphone
- ⑥ Type-C Charging Port
- ⑦ Flash Drive Slot
- ⑧ TF Card Slot
- ⑨ Solar Panels
- ⑩ 3M Adhesive

4

### Remote Control

- ⑪ Voice Button
- ⑫ Answering Button
- ⑬ Next Track Button
- ⑭ Hang Up Button
- ⑮ Previous Track Button
- ⑯ Remote control Back Cover
- ⑰ 3M Adhesive
- ⑱ 0.5M 3.5MM Aux In Cable
- ⑲ Type-C Charging Cable

### Instructions

Tear off the 3M adhesive on the back of the VM-223 and stick it on the windshield. The main unit is divided into two parts and connecting by magnets, which can be

5

used separately for cable charging. Press 3 seconds to turn on the device, and use it with the remote control.

Tear off the 3M adhesive on the back of the remote control and take out the battery insulation sheet, and then stick the remote control on the steering wheel where it is easy to operate.

6

### Frequency Modulation

Long press the voice button on remote control to enter the frequency setting interface, through the previous track button and next track button to adjust the transmit frequency.

Select any radio frequency on this device, and turn on the car FM radio, and adjust the receiving frequency of the car radio to be consistent with the frequency of the device you select. This device supports 199 transmission frequencies of 88.1MHz-107.9MHz.

(Note: When the set frequency is the same as the broadcast frequency, the sound quality will be deteriorated, simply change to other frequency).

### Bluetooth Connection

Enable Bluetooth on your smartphone and search for available Bluetooth devices, select " VM-223 " and connect.

7

### Music Play

When the VM-223 Solar FM Transmitter is successfully connected to your smartphone, you can play music from your phone, the music will be transmitted to your car stereo via Bluetooth, you can also play the music from flash drive or TF card. And to further reduce the audio signal loss during the wireless transmission, you can even connect your phone or any audio device with our product by using a 3.5mm AUX cable.

Previous Track	Press " ⏮ " to switch to the previous track

### Specifications

Input: DC 5V-1A  
Bluetooth Version: V5.0  
Audio Frequency: 20Hz~20kHz  
Working Current: 80mA(Max)  
Stand-by Current: 50uA(Max)  
Bluetooth Working Frequency: 2.402~2.480Ghz  
Bluetooth Effective Distance: 10M  
Remote Control Effective Distance: 3M  
FM Emission Effective Distance: 3M  
Sensitivity: -89dBm  
RF Output: 4dBm  
FM Frequency: 88.1MHz-107.9MHz  
Transmitting Power: 87dBuV/107dBuV

### FCC Compliance Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this

10

device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

⚠ Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.

11

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
