

 <p>AUTO-CLAMPING MAGNETIC WIRELESS CHARGER</p>  <p>USER'S MANUAL MODEL: VCW-516</p> <p>1</p>	<p>Features</p> <ol style="list-style-type: none"> 1. This product is compatible with the magnetic mobile phones. 2. Holds your phone in a snap, supports one-hand operation. 3. Supports up to 15W fast wireless charging (Depends on mobile required input). 4. The Auto-Sensing telescopic arms make clamping easier. 5. Built-in super-capacitor supports releasing clamps after power off. 6. Equipped with a hook which is easy to install and remove, fix on the air vent of the car firmly. <p>2</p>	<p>Descriptions</p>  <p>Clamps</p>  <p>LED Indicator</p>  <p>USB-C</p>  <p>Sensor Area</p>  <p>Air Vent Hook</p>  <p>Type-C Charging Cable</p> <p>3</p>	<p>Instructions</p> <ol style="list-style-type: none"> 1. Unscrew the screw nut from the charger, insert the ball joint into the groove, tighten the screw nut securely.  <ol style="list-style-type: none"> 2. Loosen the knob to extend the hook, then put the hook onto the vent, tighten the knob clockwise.  <p>4</p>	 <ol style="list-style-type: none"> 3. Plug the quick car charger into the cigarette lighter and then power on the wireless phone holder using the Type-C cable.  <p>5</p>	<ol style="list-style-type: none"> 4. When the power is turned on, the blue and red lights will flash once.  <p>Note: Some phones may not support the light-changing function when they are fully charged. If your device is magnetic compatible, the phone holder will hold your device with a snap.</p>  <p>6</p>	<p>If your device has a thick phone case or if you want to use this wireless charger as a phone holder, you can rotate the arms to the front side. Then, simply touch the sensor area to release the charger's arms and place your phone in the holder.</p>  <p>7</p>

Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.</p> <p>Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.</p> <p>This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to</p> <p>11</p>	<p>radio communications. However, there is no guarantee that interference will not occur in a particular installation.</p> <p>If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:</p> <ul style="list-style-type: none"> – Reorient or relocate the receiving antenna. – Increase the separation between the equipment and receiver. – Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. – Consult the dealer or an experienced radio/TV technician for help. <p>12</p>	<p>Safety Guide</p> <ol style="list-style-type: none"> 1. Do not drop, puncture or disassemble this product. 2. This product is not waterproof, please do not expose it to rain or water splashing. 3. For safety, do not prolong exposure to direct sunlight. 4. Do not place this product in an open flame that may cause an explosion. 5. Clean with a clean soft cloth and do not use any corrosive cleaning agent. 6. Drive safely. Do not operate this product while driving. <p>The FCC certification of this device refers to RF exposure testing performed in typical operating conditions, where a person is no closer than 20 centimeters from the device surface at all times, except for non-repetitive patterns with transient time intervals in the order of a second. Only in the stated conditions, the device is shown to fully comply with the FCC RF Exposure requirements of KDB 447498.</p> <p>14</p>	<p>What is in the Package</p> <ol style="list-style-type: none"> (1) Magnetic Wireless Charger (2) Air Vent Hook (3) Type-C Charging Cable (4) User's Manual <p>★ Please note product features will be upgraded without any notice.</p> <p>14</p>
Power On	When the power is on, the blue and red lights will flash once, lights off when the charger is in standby mode.																																				
Charging	The blue light will remain on when under the normal charging, the red light will remain on when under the fast charging. Lights off after fully charged. Note: Some phones may not support the light-changing function when they are fully charged.																																				
FOD Testing	The red and blue lights will flash alternately when a foreign object is detected or an error is sensed in the placement of the phone, and the charging process will be stopped.																																				
Overvoltage	Blue light flash																																				
Undervoltage	Blue light flash																																				
Overheating	Red light flash																																				
Issue	Problem	Prevention/Solution																																			
Weak magnetic force	The phone with thick phone case	Remove the thick phone case or clamp the phone with the telescope arms																																			
Can't hold the device with magnets	The phone doesn't support magnetic connection	Clamp the phone with the telescope arms																																			
Can't charge the device	The device doesn't support magnetic charging	The charger is incompatible with your device																																			
	There has a metal plate between the coil and the phone	Remove the metal plate																																			
Charging slowly	The input power less than 15W	The input power must exceed 15W, and use the low-loss cable																																			
	The phone with thick phone case	Recommended to use a mobile phone case with a thickness less than 4MM
