Wireless Output : 5V/1A ; 9V/0.83A ; 9V/1.12A ; 9V /1.67A
Product Size: Ø100 x 7.4mm
Charging Efficiency: ≥ 65%
Transmission Distance: ≤ 6mm

- ① Input port
- ② LED indicator
- ③ Transmitter

How to Use

Charging your wireless transmitter

1. Charge your wireless transmitter via included Type c-usb data cable. The red LED indicator will be on when plugged into a power adapter, or charge with other power source.
2. Make sure there is no any clutter on the wireless transmitter.
3. Wireless transmitter is ready for your mobile device.

Charging mobile device from wireless transmitter

1. Put your mobile device (the phone you used must could support the wireless charging or your phone are equipped with wireless receiver chip) on the wireless transmitter.

2. When your mobile device is being charged, the Blue LED indicator will keep on.

3. When your mobile device is fully charged, the Blue and Red indicator off.

4. When the red LED or blue LED indicator flashes quickly, that means there is improper operation.

When your wireless transmitter working improperly

- Clean the clutters on the wireless transmitter.
- When the wireless transmitter is over-heating, take your mobile device away from your wireless transmitter. And the transmitter will stop charging automatically when over-heating. Please try charging again when the wireless transmitter cooling down.

Remarks

1. The wattage of the power adapter you used need more than 7.5W, We suggest you use the adapter with 5V/2A output.
2. It's normal that this charger and your smart phone will be hot under operating conditions, and it may be more hotter when charging and using at the same time (such as looping music).
