Packing List

Prtukyt-008 wireless earphone	x1	Prtukyt-008 charging case	x1
Ear cap(small/large)	x2	The Manual	x1
Charging cable	x1		

Pairing

First step:The earphone into pairing status

During the first time use, open the charging box, take out the earphones (in power-—off status), press the the MFB button for 5 seconds. Then the earphones will turn on and enter pairing status.

Step 2:Phone search and connect

Turn on the Bluetooth function of the mobile phone, search the Bluetooth device"Prtukyt-008" and click "Connected". The English prompt"Connected" indicates successful connection.

Lost connect

Reason1: Please check if Bluetooth settings is turned on or not.

Reason2: Beyond the Bluetooth range, the earphone will disconnect from the Bluetooth device

-2-

Answer or end a call

Short press the MFB button of either earbud for once

Reject a call

Long press the MFB button of either earbud for once

Stop/Play

Shot press the either function key one time

Voice Assistant

Activate the "Voice Assistant" function with three clicks

Next song

Double click the multi-function button of the right earphone (if you only use the right earphone, the earphone can only perform the next song, not the last one)

Last song

Double click the multi-function button of the left earphone (if you only use the left earphone, the earphone can only perform the last song, not the next one)

Attention

1.If a call comes in while playing music, the earphone will play music automatically after the call is over.
2. If the voice assistant is used, the music will pause.

Noted: Switch between headset and mobile phone: keep both ears in contact during a call

-3-

Power off

Method 1: Put the earphones into the charging compartment and the earphones will shut down automatically (If the charging compartment is out of power, the earphones cannot be turned off, and they need to be charged in time).

Method 2: When the power runs out, the earphones will shut down automatically

Method 3: The earphones will shut down automatically without any bluetooth connection within 5 minutes after starting up.

Charge
Earphones charging state

When the power of the earphone is low, put the earphone into the charging compartment and close the top cover.

Full charge

Plug in an appropriate power supply for charging, and the indicator light is white. When it's fully charged, all four LED . light up
1. It takes about 2.5 hours to complete the charge.
2. Please use the 5V 1A charger to charge the charging box

-4-

Battery indicator state of charging case

When the earphone is just put into the charging compartment, the LED lights of the charging compartment will be displayed for 10 seconds. The four white LED lights will display the corresponding power of 100%,75%, 50% and 25% respectively.

Charging—cradle battery use

Tip:
When the charge compartment is fully charged, the four lights are always on

Prtukyt-008 Wireless Earbuds Q&A

Q: How to pair two unpaired earphones?

A: Open the charging compartment, take out the earphone (when the earphone is off), press the "multi-function" button for 5 seconds to turn on the earphone , and enter the Pairing state. A English prompt tone "connected"will be heard. Double click the MFB button, and when you hear "ding —dong" , the two earphones are paired successfully.

Q: Why can't my earphones charge?

A: First: please make sure that the isolation film at the bottom of the earphone has been removed.
Second: Wipe the charging contacts with an alcohol cloth
Third: please make sure the charging case is powered (if the charging case is out of power, please use the correct data cable to charge the charging case first)
Fourth: Please make sure the earphone is put into the charging compartment correctly
Fifth: If the earphone still cannot be charged, please send the video of the problem to our official after- sales email box, and we will help you to solve the problem.

Q: How do I connect the earphone to another phone?

A: First: disconnect the bluetooth device of the first mobile phone
Second: turn on the bluetooth function of another mobile phone, search for the bluetooth device"Prtukyt-008"and click Connect. The English prompt "connected"indicates the connection is successful

-8-

Q: The earbuds turn off without any action?

A: First of all, make sure your headphones are fully charged
Second: Please check that if you accidentally touch the multi-function button, that cause the headset to turn off.

Q: how to use a single earphone?

A: If Prtukyt-008 earphones are paired and a single earphone is not connected, make sure the other earphone is turned off.
Press and hold the earphone multifunction key for 5 seconds to enter the pairing status, then you can pair the phone.

Q: Why can't my charging case get charged?

A: First of all, please check whether the charging port is blocked
Second, make sure that the correct charging cable is used
Third, make sure you connect to the charging port correctly

Q: How long is the wireless distance between the left and right earbuds that will not disconnect?

A: The distance in the normal environment is 2M (without any ostacles).

Q: No sound from the headphones?

A: 1. Please check whether the volume is set to zero
2. Please check whether the mobile phone media audio Settings are on

-9-

Safety Instructions:

To extend the life of the earbuds, please be sure to comply with the following instructions:
1. Please do not disassemble, replace or modify the product.
2. Do not put the product in a humid environment.
3. Do not touch the earphone in corrosive liquid, or it will cause serious damage.
4. Do not use any corrosive cleaner/oil to clean the earphone; If the earphone comes into contact with liquid, wipe it quickly.
5. Do not place the equipment at too high or too low temperature (below 0℃ or above 45℃).
6. Please do not overcharge the equipment for a long time, as it will cause damage and reduce the battery life.
7. Prolonged use of earphones at high to moderate volume can cause permanent hearing loss. To protect your ears, always keep the volume moderate to low.
8. Discontinue use immediately if you feel any discomfort or pain.
9. Please use the prescribed DC—5V 1A charger/adapter, repeated charging and discharging of the headset will cause the battery performance to degrade over time, This is normal for all rechargeable batteries.Discharge over time will lead to battery performance degradation.
10. The product has a lithium battery built in. Please do not expose the product to strong sunlight, bake or throw it into the fire, as they may explode.

Tip:

1. Do not discard electronic products as household waste;
2. Please keep earbuds and boxes out of reach of children.
3. If the earphone is immersed in water, the warranty is invalid.
4. IPX7 waterproof, only sweatproof and a little rain, cannot use it for swimming or bathing.
