

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of a device. The black plastic housing is open, revealing a green printed circuit board (PCB) and a battery. A white ribbon cable connects the battery to the PCB. A black ruler is placed vertically on the left side of the assembly for scale.
Solder Board-Component View 1	 A close-up photograph of the green PCB. Various electronic components are visible, including a microcontroller, capacitors, and a USB connector. A black wire is connected to a component on the right side of the board. A black ruler is placed vertically on the left side of the board for scale.

Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) component, labeled '2', resting on a blue textured surface. The component is rectangular with various electronic components and a long, thin, curved wire attached to its right side. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters. The ruler is oriented vertically in the image, with the 0 mm mark at the top and the 100 mm mark at the bottom.
Solder Board-Component View 3	 A photograph of a green printed circuit board (PCB) component, labeled '3', resting on a blue textured surface. The component is rectangular and features a large, square, yellowish-green display area. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters. The ruler is oriented vertically in the image, with the 0 mm mark at the top and the 100 mm mark at the bottom.

Solder Board-Component View 4	 A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 4'. The component is rectangular and features three large, dark, circular solder pads arranged in a triangular pattern. It is populated with various electronic components, including integrated circuits, resistors, and capacitors. The board is placed on a blue textured surface next to a black ruler with white markings. The ruler shows dimensions in millimeters, with the component's width being approximately 40 mm and its height approximately 30 mm.
Solder Board-Component View 5	 A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 5'. This component is rectangular and features a large, central, irregularly shaped solder pad. It is populated with various electronic components, including integrated circuits, resistors, and capacitors. The board is placed on a blue textured surface next to a black ruler with white markings. The ruler shows dimensions in millimeters, with the component's width being approximately 40 mm and its height approximately 30 mm.

Solder Board-Component View 6	 A photograph showing a small, rectangular, silver-colored component, likely a battery, resting on a blue textured surface. The component has a gold-colored solder pad on one end. Two thin wires, one red and one black, are attached to the component. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters. The component is positioned between the 10 mm and 40 mm marks on the ruler.
Antenna View	 A photograph showing a green printed circuit board (PCB) with various electronic components, including a microcontroller, capacitors, and a USB connector. A red rectangular box highlights a specific area on the right side of the board, which is labeled "433.22MHz Antenna". A red line points from the label to the highlighted area. A black ruler with white markings is placed horizontally below the PCB, showing measurements in millimeters. The PCB is positioned between the 10 mm and 40 mm marks on the ruler.
