- Check phone compatibility and call quality
- Confirm that the distance is too far or the surrounding environment is too far
- Do not stay in the environment of signal interference

Can't hear from Bluetooth headset?

- Check whether the earphone volume is mute
- Check whether the Bluetooth headset is connected to the device
- Check whether the Bluetooth headset is too far away from the mobile phone or there is interference around.

What is a custom hifi Bluetooth headset?

- Collect the pinna of most people, and make Bluetooth headset closer to the appearance of the pinna through data analysis. It is comfortable to wear and has good sound insulation effect.
- Learn from the acoustic cavity and acoustic devices of customized wired headphones, combined with many years of experience in tuning, to cast Bluetooth headphones with high fidelity sound quality.
- Learn from the production process of customized wired earphones, which are all hand-made and strive for perfection. Each earphone is as flawless as a work of art.

What are the advantages of Bluetooth 5.2?

- More stable signal
- Long endurance
- Better sound quality
- More humanized operation
- Lower radiation

FCC STATEMENT

- This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.
- This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 - Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.
- To assure continued compliance, any changes or modifications not expressly approved by the party.
- Responsible for compliance could void the user's authority to operate this equipment. (Example-use only shielded interface cables when connecting to computer or peripheral devices).
- This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
 - (1) This device may not cause harmful interference, and
 - (2) This device must accept any interference received, including interference that may cause undesired operation.

RF WARNING STATEMENT

- The device has been evaluated to meet general RF exposure requirement.
- The device can be used in portable exposure condition without restriction.
