Dear UL TCB / FCC / ISED Certification Bureau

This application for modular approval is made on the understanding that use of the module will be limited to installation in host systems manufactured by Peelle or under our direct control as detailed in KDB 996369 D03 section 2.1

We understand that host systems will need to be labeled with Contains FCC ID: 2AYO9-WFDCRFIF / IC: 26868-WFDCRFIF when the module's label is not visible. The systems will be always considered mobile or fixed devices (not portable) and the system manuals will include instructions for installing the system so that rf exposure requirements are met. Manuals shall also include the transmitter-related statements from FCC Part 15 and RSS GEN.

All applicable system level testing and approvals for e.g. FCC Part 15 B and ICES-003 will be applied and confirmation of continued compliance with requirements related to the modular transmitter as detailed in KDB 996369 D04.

Regards,

Frank Leo  
Engineering Manager
