The benefits we give in this manufacturer's warranty are **additional to** any rights and remedies that you may have under local consumer protection laws. Nothing in this warranty limits or affects your legal rights.

This manufacturer's warranty is governed by the laws of the country in which you purchased your Linksys product. In many countries, consumers have rights under local consumer laws. Those consumer rights may differ between countries, states and provinces, and often cannot be excluded. Your local consumer rights organization can advise you on your legal rights.

This manufacturer's warranty is not intended to:

- change or exclude any rights under consumer law that cannot be lawfully changed or excluded; or
- limit or exclude any right you have against the person who sold the Belkin, Linksys or WeMo product to you if that person has breached their sales contract with you.

WHAT DOES THIS WARRANTY COVER?

MR7500 series Legal Disclaimers

Specifications are subject to change without notice. An active, customer-purchased Internet Service Provider broadband account is required for connection of this product and other connected devices to the Internet. Some devices may require additional wireless adapters or an Ethernet cable to connect. Number of connected devices is based on lab test results and may be different for your network.

Maximum Performance derived from IEEE Standard 802.11 specifications. Actual performance may vary, including lower wireless network capacity, data throughput rate, speed, range and coverage. Performance depends upon many factors, conditions and variables, including building materials and construction, volume of network traffic, mix of wireless products used, interference and other adverse conditions. In order to achieve the best performance, this product must be used with compatible AX6600 wireless devices. The standard transmission rates for each node—4804Mbps (for 6 GHz), 1201 Mbps (for 5 GHz), 574 Mbps (for 2.4 GHz)—are the physical data rates. Actual data throughput will be lower and may depend on the mix of wireless products used and external factors.

May require a software/firmware update available for download at linksys.com/support.

Claims relating to reducing power consumption will vary depending on age of device, device storage conditions, device battery degradation over time, and other factors during use such as temperature, connected cables, discharge rate, and device type. In general, device batteries have limited recharge cycles and may eventually need to be replaced.

The product provides a range of up to 2700 square feet (approximately 250 square meters). Range can vary with the number and placement of nodes in the system. Range specifications are based on performance test results under normal use case conditions. Actual ranges will vary depending on wireless interference, physical obstructions, operating environments and building material. Wireless coverage claims are used only as reference and are not guaranteed, as each wireless network is unique. Additional Nodes (available for purchase separately) may be required for especially large houses or buildings with thick or dense walls. Coverage of all homes cannot be guaranteed due to variations in size, layout, building materials and the level of wireless interference present.
