

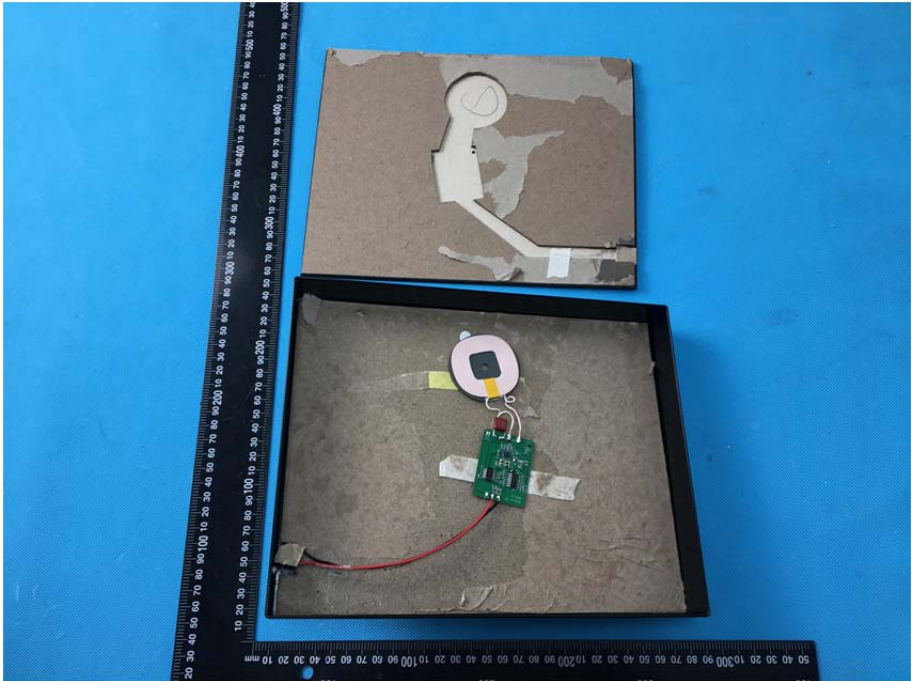

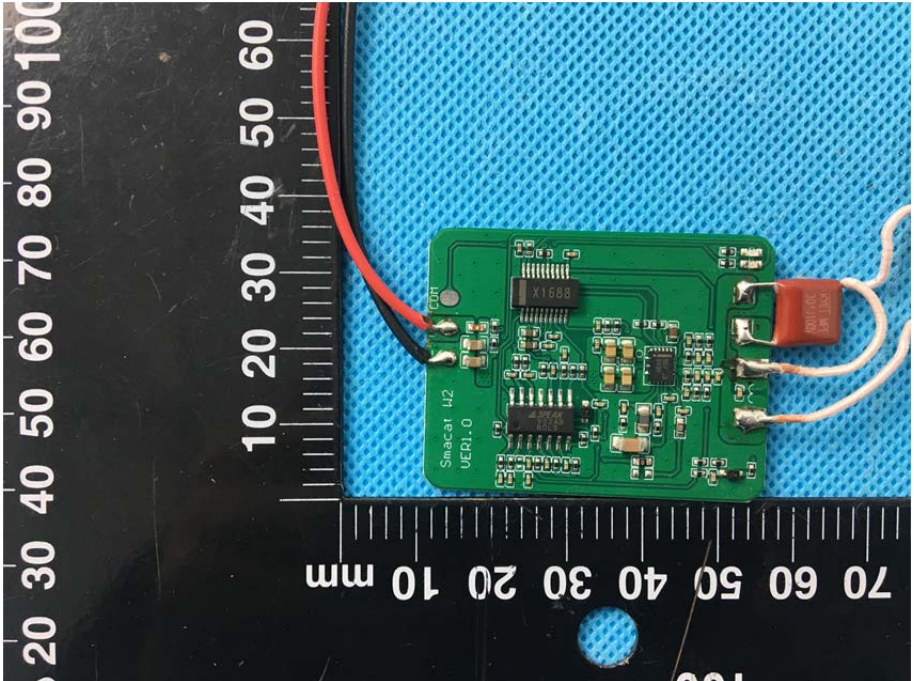

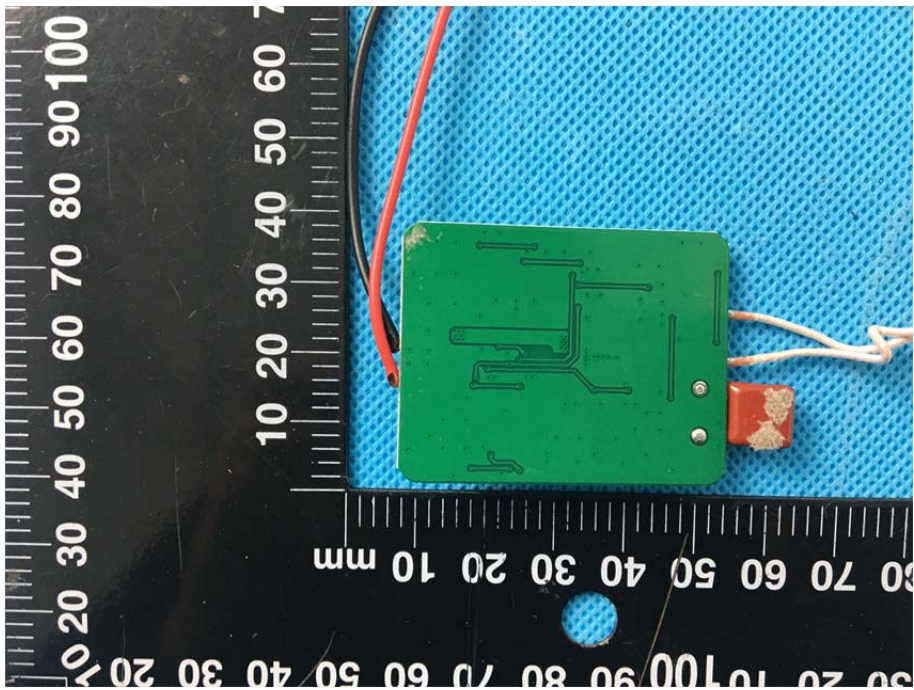

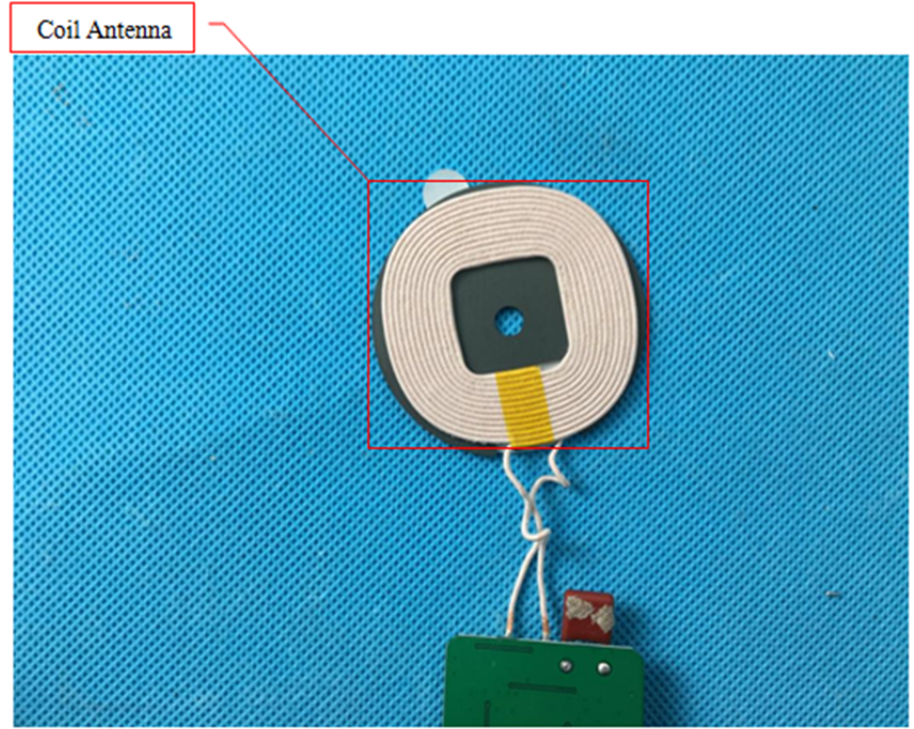

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p>EUT Housing and Board View 1</p>	 A photograph showing the internal components of an EUT housing. A green printed circuit board (PCB) is mounted on a grey cardboard base. A red cable is connected to the board. A circular component, possibly a camera lens or sensor, is mounted on the board. A ruler is placed vertically to the left of the board for scale. The background is a blue textured surface.
<p>Solder Board-Component View 1</p>	 A close-up photograph of the green PCB components. The board is labeled "SmaCat H2" and "UEP1.0". A red cable is soldered to the board. A small orange component, possibly a capacitor, is also visible. A ruler is placed vertically to the left of the board for scale. The background is a blue textured surface.

<p style="text-align: center;">Solder Board-Component View 2</p>	 <p>A photograph showing a green printed circuit board (PCB) component mounted on a blue textured surface. A black ruler is placed vertically to the left of the component, with markings from 0 to 100 mm. The component is rectangular and has several traces on its surface. A red wire and a black wire are connected to the component. A small red component is visible on the right side of the PCB.</p>
<p style="text-align: center;">Antenna View</p>	 <p>A photograph showing a close-up view of a coil antenna. The antenna is a circular, multi-layered structure with a central square hole. It is mounted on a blue textured surface. A red box highlights the antenna, and a red line points to a label "Coil Antenna" in the top left corner. The antenna is connected to a green PCB component via a white wire and a red component.</p>
