Fleet Portal variants description for certification of FCC ID: 2AZ55-FSPOR0201.

Fleet Portal comes with 2 variant models:

FSPOR0201-2 : Portal with 4G option

(Contains Quectel Single Modular certified - FCC ID: XMR201805EC21AU)

FSPOR0201-3 : Portal with NB-IoT option

(Contains Quectel Single Modular certified - FCC ID: XMR201707BG96)

Fleet portal carrier board has a standard mini PCIe slot which can accommodate either 4G or NB-IoT module as the mechanical form factor is same and the electrical interface is a common standard USB port.

Both the 4G module (EC21-mPCIe) and NB-IoT module (BG96-mPCIe) is from the same manufacturer "Quectel", hence the firmware and the electrical interface is compatible to each other.

With the above stated difference Fleet space would like to differentiate the Fleet portal product having 4G/NB-IoT internet back haul options with the proposed unique model numbers.

Sincerely,

Flavia Tata Nardini
CEO + Co-founder
Fleet Space Technologies
