

**Declaration of Similarity (DoS)
for
Product Families**

To Whom it May Concern:

We, the undersigned manufacturer, confirm hereby that the following models are identical in all electrical *safety, RF, and electromagnetic* aspects from a regulatory perspective. The system tested was the *Model number/Name* and represents a typical worst-case installation.

The following table describes the model number differences.

Model Differences:

- ***T14399 SKU 2 CONTROLLER***
This controller was the model that was tested and in the report. The tested components in this were the auger motor, fan motor, ignitor, power supply board, temperature RTD, meat probes, and pellet sensor. The software version on this one is set for the 32 inch grill body without cabinet.

- ***T15826 SKU 3 CONTROLLER***
This controller is used in SKU 3. The tested components in this were the auger motor, fan motor, ignitor, power supply board, temperature RTD, meat probes, and pellet sensor. The software version on this one is set for the 32 inch grill body with cabinet.

- ***T14348 SKU 1 CONTROLLER***
This controller is used in SKU 1. The tested components in this were the auger motor, fan motor, ignitor, power supply board, temperature RTD, meat probes, and without pellet sensor. The software version on this one is set for the 28 inch grill body without cabinet.
