## Declaration on Model Differences

To whom it may concern,

The two sub models DH019C0—GG—1810 and DH019C0—GG—1850 that live under model Detector\_HDR\_XRL, the difference between them is the physical PIR lens angle, this is a purely non electronic change and has no impact on the electronic parameters.

Sincerely,

Signature:

A handwritten signature in blue ink, appearing to read "Tauri Tuubel", written over a light blue horizontal line.
