Internal Labeling Request

To whom it may concern,

Based on the guidance of KDB 784748 D01, Section 3, Defendec Ltd., has determined that external labeling of their product would not be desirable for end users for the following reasons:

- 1) The product is used outdoors and will be subject to environmental degradation; over time any external labeling will be worn away.
- 2) The product is typically mounted and an end user does not readily view the external labeling of the product; the one time the product labelling will be reviewed is during the product installation.

The labeling of the product can be safely put into a user accessible battery cavity, as pictured below, and this will ensure the labeling will not be degraded over time.

Sincerely,

Signature:

A handwritten signature in blue ink, appearing to read "Tauri Tuubel", is positioned to the right of the "Signature:" label.
