INTERNAL PHOTOGRAPHS

A photograph of a green printed circuit board (PCB) with various electronic components. The board is rectangular with rounded corners and features several mounting holes. A central microcontroller is visible, surrounded by numerous capacitors, resistors, and other passive components. A connector is located on the left side. The board is placed on a yellow ruler for scale, with markings in inches and centimeters visible. The components are labeled with alphanumeric codes, and the board itself has some text printed on it, including "T.C." in the top left corner.
