

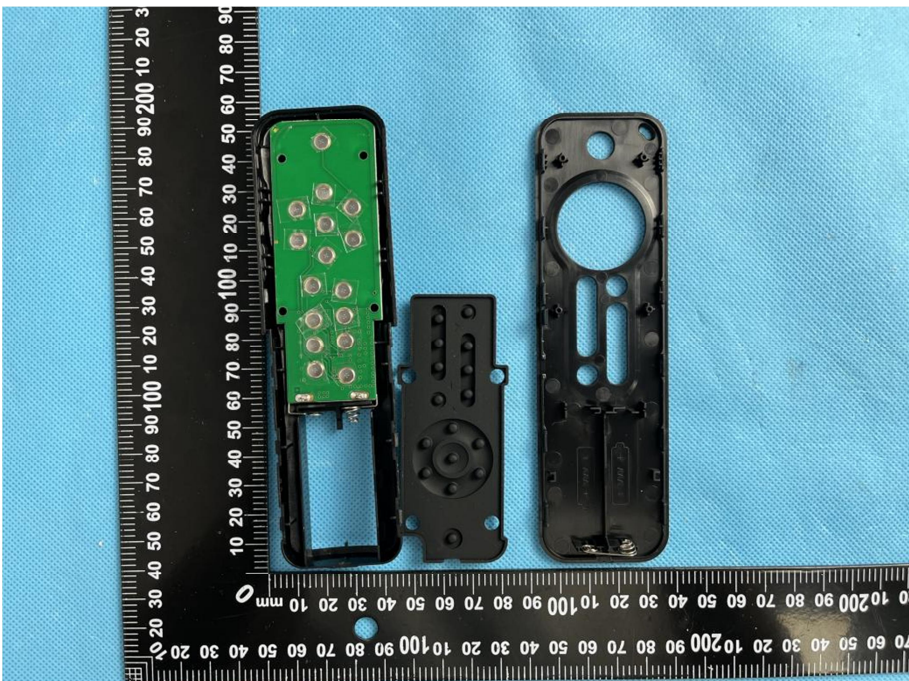

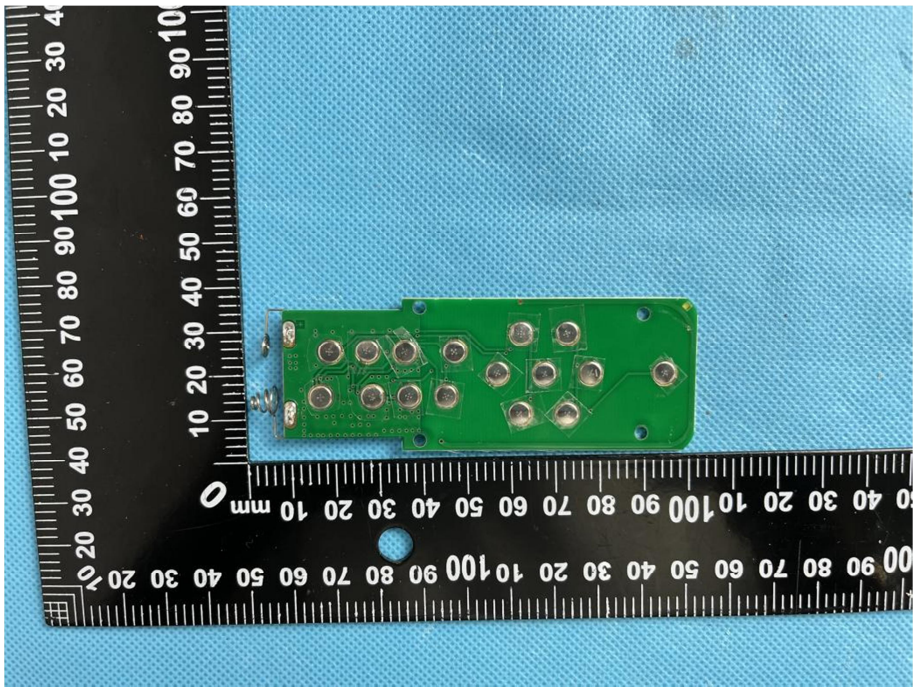

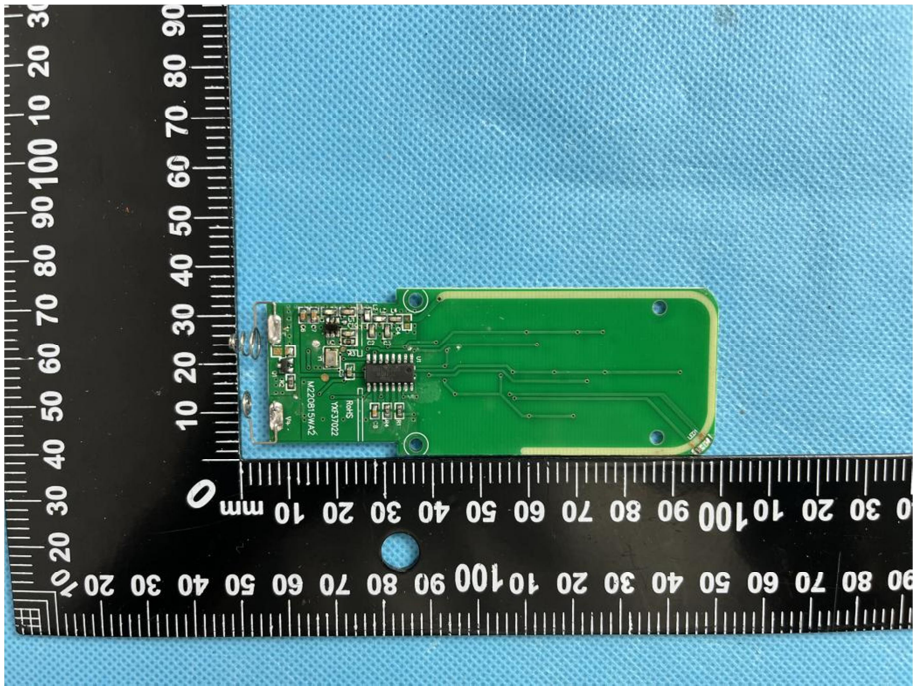

### EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p><b>EUT Housing and Board View 1</b></p>	 A photograph showing two black plastic components of an EUT housing. The component on the left is a larger, rectangular piece with a circular opening at the top and a slot at the bottom. The component on the right is a smaller, rectangular piece with a circular opening at the top. Both components are placed on a blue fabric surface next to a black ruler with white markings. The ruler is oriented vertically, with the 0 mark at the top and the 100 mm mark at the bottom. The components are positioned between the 100 mm and 120 mm marks on the ruler.
<p><b>EUT Housing and Board View 2</b></p>	 A photograph showing three black plastic components of an EUT housing and a green printed circuit board (PCB). The component on the left is a larger, rectangular piece with a circular opening at the top and a slot at the bottom. The component in the middle is a smaller, rectangular piece with a circular opening at the top. The component on the right is a larger, rectangular piece with a circular opening at the top and a slot at the bottom. The green PCB is placed on top of the component on the left. All components are placed on a blue fabric surface next to a black ruler with white markings. The ruler is oriented vertically, with the 0 mark at the top and the 100 mm mark at the bottom. The components are positioned between the 100 mm and 120 mm marks on the ruler.

<p><b>Solder Board-Component View 1</b></p>	 A photograph of a green printed circuit board (PCB) component with several circular solder pads. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length being approximately 100 mm and its width around 25 mm.
<p><b>Solder Board-Component View 2</b></p>	 A photograph of the same green PCB component from a different perspective, showing the underside. It features various electronic components, including a large integrated circuit (IC) and several smaller components. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length being approximately 100 mm and its width around 25 mm.
