

RE: 701x, Inc.
FCC ID: 2AZT3-701XB01

Exhibit Label.pdf –

- i. Please provide label materials details (i.e. paper label, adhesives, etched, etc);
- ii. EUT appears to be large enough to contain the FCC Part 15.19 statement, please address accordingly;

RESPONSE: The label material is etched into the plastic using a laser marking method. For 4ii. we would prefer to not place the statement on the label.

Exhibit User Manual.pdf –

Are there any user instructions for the base station? Is everything listed in the app? There are no instructions or details regarding the transmitters.

Response: All setup instructions will be in the app. The device comes automatically configured for radio operations and the user is not required to perform much setup process other than mounting it, and "assigning" it to a point of interest in their app.
