Attention: Application Examiner

RE: Request for Confidentiality
Applicant: 701x, Inc
FCC ID: 2AZT3-701CT1

To Whom It May Concern:

Request is hereby submitted by 701x, Inc to withhold permanently from public review certain portions of the application for equipment certification for the referenced FCC identifiers. This request for confidentiality is made pursuant to 47 CFR 0.457(d) and 0.459 of the FCC Rules. In particular, the following sections of the application are to be kept permanently confidential:

- **Schematics**
- **Detailed Block Diagrams**
- **Detailed Operational/Functional Description**
- **Internal Photos**

These items contain detailed system and equipment description and related information about the product which 701x considers to be proprietary, confidential and a custom design which otherwise would not be released to the general public. Since this design is a basis from which future technological products will evolve, 701x also feels that this information would be of benefit to its competitors, and that the disclosure of the information in these exhibits would give our competitors an unfair advantage in the market.

701x requests permanent confidentiality for internal photographs, as the inside of the device will not be easily accessible to view the printed circuit board. The interior enclosure is permanently sealed by a plastic welding process and would require destruction of the device to attempt to gain access to interior components.

Sincerely,

Braydon Love
Certification Engineer
701x
