RE: FCC Certification
FCC ID: 2AZUJ-SYS-C60-LMC2

To Whom It May Concern:

The module tested and certified under FCC ID: Z64-WL18DBMOD, granted on 03/27/2018, is incorporated in the E.8.006.03 (FCC ID: 2AZUJ-SYS-C60-LMC2) and there is no hardware design change on the module.

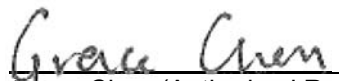

For this submission we are filing original test reports that still accurately represent conducted test results under the new conditions described above refer the KDB 996369 D02 Q1 a) 2). The original tests used are list below and only used for valid conducted results.

Module Report	Re-used Data Test Item
FR4O0971A	Number of Hopping Frequency, Average Time of Occupancy, Hopping Channel Separation, Bandwidth, Antenna conducted Spurious Emission
FR4O0971B	Bandwidth, Power Spectral Density, Antenna conducted Spurious Emission
FR4O0971C	Bandwidth, Power Spectral Density, Antenna conducted Spurious Emission
FR4O0971D	Bandwidth, Power Spectral Density, Automatically Discontinue Transmission
FR4O0971E	Bandwidth, Power Spectral Density, Automatically Discontinue Transmission
FR741330	Bandwidth, Power Spectral Density, Automatically Discontinue Transmission
FZ4O0971	Transmit Power Control (TPC) and Dynamic Frequency Selection (DFS)

The new test reports show additional evidence for RF output power and radiated spurious emission results to demonstrate full compliance of both module integrated into the host and host itself.

Thank you for your attention to this matter.
