## FAQ

Q1. After the phone is matched with the smartwatch, why does the voice of the mobile phone send out from the watch?

- Please turn off the sound setting. The sound will not be sent from the watch.

Q2. Unsuitable usage scenarios?

- Hot water shower, hot spring, sauna (steam room), platform diving, and other activities under high water pressure, temperature, humidity, and high-speed water flow. It's also not applicable for diving activities at a depth of more than 1.5m. After using in seawater, please rinse with fresh water and dry it.

Q3. Why cannot the watch receive any message?

- Android phone:
  1. Confirm to turn on the message push on your phone;
  2. Open the "GT FIT Pro" App, and turn on the "SMS reminder" and "APP reminder".
- iOS Phones:
  1. Confirm to turn on the message push on your phone;
  2. First make sure the confirmation message display normally on your phone. And then open the "GT FIT Pro" App, and turn on the "SMS reminder" and "APP reminder".

#### Q4. About battery.

- Normal use: Equipped with 300mAh battery, the smartwatch can be used for up to 5-7 days. And the standby time is up to 20-25 days. The actual battery life depends on personal usage habits.  
Usage scenario: Bluetooth calls for 15mins/week, music playing for 15mins/week, constant heart rate, scientific sleep at night, average exercise for 60mins/week, message notification (50 messages, 6 calls, 3 alarm clocks/day), and 200 times of lighting up your screen.
- Heavy use: The smartwatch can heavily used for up to 3-4days. The actual battery life depends on personal usage habits.  
Usage scenario: Bluetooth call for 30mins/week, music playing for 30mins/week, constant heart rate, scientific sleep at night, opening pressure, emotion, fatigue, body temperature, and other 24-hour continuous monitoring, with an average of 120mins of exercise/week, opening message notification (50 messages, 6 calls, 3 alarm clocks/day) and lighting up screen for 20mins/day.

## FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance

could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help. The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
